The Routledge Companion to Architectural Pedagogies of the Global South Harriet Harriss, Ashraf M. Salama, Ane Gonzalez Lara, 2022-12-30 The established canon of architectural pedagogy has been predominantly produced within the Northern hemisphere and transposed or imposed across schools within the Global South more often with scant regard for social economic political or ecological culture and context nor regional or indigenous pedagogic principles and practices Throughout the Global South architecture's academic community has been deeply affected by this regime how it shapes and influences proto professionals and by implication architectural processes and outcomes too The Routledge Companion to Architectural Pedagogies of the Global South resituates and recenters an array of pedagogic approaches that are either produced or proliferate from the Global South while antagonizing the linguistic epistemological and disciplinary conceits that under imperialist imperatives ensured that these pedagogies remained maligned or marginalized The book maintains that the exclusionary implications of architectural notions of the orders the canon and the core have served to constrain and to calcify its contents and in doing so imperiled its relevance and impact In contrast this companion of pedagogic approaches serves to evidence that architecture's academic and professional advancement is wholly contingent on its ability to fully engage in an additive and inclusive process whereby the necessary disruptions that occur when marginalized knowledge confronts established knowledge result in a catalytical transformation through which new co created knowledge can emerge Notions of tradition identity modernity vernacularism post colonialism poverty migration social and spatial justice climate apartheid globalization ethical standards and international partnerships are key considerations in the context of the Global South How these issues originate and evolve within architectural schools and curricula and how they act as drivers across all curricula activities are some of the important themes that the contributors interrogate and debate With more than 30 contributions from 55 authors from diverse regional racial ethnic gender and cultural backgrounds this companion is structured in four sections that capture critique and catalog multifarious marginalized pedagogical approaches to provide educators and students with an essential source book of navigational steers core contestations propositional tactics and reimagined rubrics The Routledge Companion to Architectural Pedagogies of the Global South pioneers a transposable strategy for academics from all disciplines looking to adopt a tested approach to decolonizing the curriculum It is only through a process of destabilizing the hegemonic epistemological and disciplinary frameworks that have long prescribed architecture's pedagogies that the possibility of more inclusive representative and relevant pedagogical practices can emerge

Architectures of Ageing in Place Anuradha Chatterjee, 2025-11-14 *Architectures of Ageing in Place* provides curated critical perspectives from a practice based research point of view of buildings that are purpose built and or refurbished to accommodate housing and care needs of older people ageing in place in high rise medium rise integrated communities This book identifies design innovations in line with policy innovations that have been made across private and public sectors to

accommodate wellbeing and quality of life of older people living in integrated communities which continue to foster intergenerational dialogue and exchange and advance social citizenship Case studies from a diverse range of geographies are examined including Portugal Singapore India New Zealand UK Sweden Belgium and the US Chapters are grounded in evidence based research including substantial primary data and post occupancy evaluation specifically the evaluation of architecture s social performance Projects highlight high rise medium rise as an emerging and successful typology in accommodating residential and care needs of older people Taking a broad interdisciplinary approach this book will be a helpful reference not only for architects designers and urban planners but also for students and practitioners in health and social care gerontology ageing and medical sociology *Digital Images and Art Libraries in the Twenty-First Century* Susan Wyngaard, 2013-04-03 Increase your knowledge of the digital technology that is essential for art librarianship today *Digital Images and Art Libraries in the Twenty First Century* is your key to cutting edge discourse on digital image databases and art libraries Just as early photographers tried to capture the world to make it accessible now information professionals in art libraries and art museums are creating and sharing digital collections to make them broadly accessible This collection shares the experience and insight of art information managers who have taken advantage of digital technology to expand the coverage and scope of image collections and improve access to previously difficult to locate information In *Digital Images and Art Libraries in the Twenty First Century* you will learn step by step what goes into the planning and creation of these digital global museums and what advances are still being made in this rapidly evolving discipline The pros and cons of these ventures are thoroughly examined as experts take you through the theoretical and practical issues they have faced along the way *Digital Images and Art Libraries in the Twenty First Century* will help you gain a better understanding of image censorship Web filters user expectations the comparative impact on the viewer of surrogate images versus artifacts databases as an in class teaching and learning tool You can also read in depth about the existing digital image collections ArtSTOR and OhioLINK Digital Media Center DMC as well as the specific art library materials being considered for these collections Find out what it takes to catalogue these materials and how the proliferation of digital images is changing the profession of art librarianship *Digital Images and Art Libraries in the Twenty First Century* is a thorough and highly specialized book suitable for expert librarians and visual resource curators but its straightforward style also makes it suitable for beginners and students interested in library and information science programs *France* Jean-Louis Cohen, 2014-08-15 Everyone knows Notre Dame the Eiffel Tower and the chateaux of the Loire Valley but French architects have also produced some of the most iconic buildings of the twentieth century playing a central role in the emergence and development of modernism In *France* Jean Louis Cohen presents a complete narrative of the unfolding architectural modernity in the country grappling not only with the buildings but also with the political and critical context surrounding them Cohen examines the developments in urban design and architecture within France depicting the continuities and breaks in French architecture

since 1900 against a broader international background Describing the systems of architectural exchange with other countries including Italy Germany Russia and the United States he offers a new view on the ideas projects and buildings otherwise so often considered only from narrow nationalistic perspectives Cohen also maps the problematic search for a national identity against the background of European rivalries and France s colonial past Drawing on a wealth of recent research this authoritatively written book will challenge the way design professionals and historians view modern French architecture
