The Routledge Handbook of Magazine Research David Abrahamson, Marcia R. Prior-Miller, 2015-06-05 Scholarly engagement with the magazine form has in the last two decades produced a substantial amount of valuable research. Authored by leading academic authorities in the study of magazines, the chapters in *The Routledge Handbook of Magazine Research* not only create an architecture to organize and archive the developing field of magazine research but also suggest new avenues of future investigation. Each of 33 chapters surveys the last 20 years of scholarship in its subject area, identifying the major research themes, theoretical developments, and interpretive breakthroughs. Exploration of the digital challenges and opportunities which currently face the magazine world are woven throughout, offering readers a deeper understanding of the magazine form as well as of the sociocultural realities it both mirrors and influences. The book includes six sections: Methodologies and structures presents theories and models for magazine research in an evolving global context; Magazine publishing: the people and the work introduces the roles and practices of those involved in the editorial and business sides of magazine publishing; Magazines as textual communication surveys the field of contemporary magazines across a range of theoretical perspectives; subjects, genre, and format questions; Magazines as visual communication explores cover design, photography, illustrations, and interactivity; Pedagogical and curricular perspectives offers insights on undergraduate and graduate teaching topics in magazine research; The future of the magazine form speculates on the changing nature of magazine research via its environmental effects, audience, and transforming platforms. *Reimagining Research* Trevor J. Buser, Sandy Gibson, 2023-06-16 *Reimagining Research* centers antiracist research practices and showcases real world research in counseling practice. The book focuses on the research competencies that matter most to counselors, with each chapter co-authored by practicing counselors and counselor educators. Each chapter reflects diversity in authorship and opens with a potential for practice case study that illustrates a research-related challenge in the practice of counseling. Online resources including a focus group interview sample transcripts of qualitative interviews, video demonstrations of statistical techniques, and other documents used in research processes present these potentials for practice in experiential ways. Chapters close with attention to resources that are readily available for counselors who want to implement these practices, such as evidence-based practice guidelines, open access journals, and open access statistical tools.

Reversing Deforestation Brent Sohngen, Douglas Southgate, 2024-12-10 Dire reports of surging deforestation in the Brazilian Amazon appear often in international headlines with commentators decrying the destruction of tree covered habitats as an act of environmental vandalism Although forest losses are alarming broader trends are bending in the direction of forest recovery In this book Brent Sohngen and Douglas Southgate address the long term recovery of forests in Latin America The authors synthesize trends in demography agricultural development and technological change and argue that slower population growth and increasing crop and tree yields in conjunction with protecting local ownership of natural resources have encouraged forest transition This book explores how market forces ownership arrangements and the enforcement of property rights have influenced this shift from net deforestation to net afforestation Forest transitions have happened before such as the recovery of tree covered habitats in Europe and the United States Signs of a similar transformation in land use are now present in Latin America Ending deforestation requires a strengthening of forest dwellers property rights while ensuring that biodiversity conservation is no longer treated as a value less externality The resulting forest landscape actively managed for ecosystem services will be more resilient as is needed to overcome climate change

Why Gender Matters, Second Edition Leonard Sax, M.D., Ph.D., 2017-08-29 A revised and updated edition with more than 70% new material of the evergreen classic about the innate differences between boys and girls and how best to parent and teach girls and boys successfully with completely new chapters on sexual orientation and on transgender and intersex kids Eleven years ago Why Gender Matters broke ground in illuminating the differences between boys and girls how they perceive the world differently how they learn differently how they process emotions and take risks differently Dr Sax argued that in failing to recognize these hardwired differences between boys and girls we ended up reinforcing damaging stereotypes medicalizing normal behavior see the rising rates of ADHD diagnosis and failing to support kids to reach their full potential In the intervening decade the world has changed drastically with an avalanche of new research which supports

deepens and expands Dr Sax's work This revised and updated edition includes new findings about how boys and girls interact differently with social media and video games a completely new discussion of research on gender non conforming LGB and transgender kids new findings about how girls and boys see differently hear differently and even smell differently and new material about the medicalization of bad behavior *Symposium*, 2008 *Archives and New Modes of Feminist Research*

Maryanne Dever, 2020-04-28 In an era when the metaphor of the archive is invoked to cover almost any kind of memory collection or accumulation it is important to re-examine what is entailed politically and methodologically in the practice of feminist archival research This question is central not only to the renewed interest many disciplines are showing in empirical research in archives but also given the current explosion of online social and cultural data which has fundamentally transformed what we understand an archive to be Contributors in this collection are keen to mark out what may be novel and what is enduring in the ways in which feminist thought and feminist practice frame archives Importantly they engage with archives in their historical and political complexity rather than treating them as simple repositories of source material In this respect contributors are keenly interested in what it means to archive particular materials and not simply in what those materials may hold for feminist researchers The collection features established and emerging feminist scholars and brings together interventions from across such disciplines as history literature modernist studies cinema studies and law This book was originally published as a special issue of the journal *Australian Feminist Studies* **Sex Segregation in Sports**

Adrienne N. Milner, Jomills Henry Braddock II, 2016-02-12 Why isn't segregation based on sex illegal in sports just as race segregation is This book examines the controversial issue arguing that separate but equal is neither achievable nor constitutional Will the creation of coed teams help mitigate issues of perceived sex discrimination in sports or will equity among male and female athletes come from better enforcement of the separate but equal ideal This book examines this highly charged issue specifically challenging the effectiveness of Title IX and arguing that it be ousted in favor of sex integration This is the first book to present both legal and social arguments for the elimination of sex segregation in sports and provide tangible solutions to address this issue Authors Adrienne N Milner and Jomills Henry Braddock II lay out the potential benefits of comingling male and female athletes illustrating how this process may translate to greater sex equality in social economic and political contexts In addition this forward thinking work offers specific recommendations for facilitating the integration of sexes in sports and discusses the importance of changing attitudes and ideology within the sports community and the general public to achieve this goal *Archival Arrangement and Description* Lois

Hamill, 2017-07-08 *Archival Arrangement and Description* Analog to Digital teaches the core functions of arrangement and description A historical summary grounds new archivists to assess proposed changes for digital files After presenting the basics of arrangement and description processing for analog materials the text segues to digital materials incorporating the OAIS preservation model into a detailed sample workflow Although accessioning and technical appraisal precede processing

they are discussed because they are performed differently for digital materials and create a different starting point for processing digital files Description is external to the OAIS model but linked to it Recent advances in description and its delivery are presented along with concerns for the ability of smaller archives to participate in envisioned future developments that are technology reliant New specialties like digital curation and data curation show the continued relevance of archival expertise for the digital future Rich with extras the text includes and points to many readily web accessible additional resources

Frontiers in the Nutrition Sciences Institute of Medicine, Food and Nutrition Board, 1989-01-01 This series of individually authored chapters examines the nature and extent of scientific advances in the nutrition sciences and describes both future opportunities in the field and barriers to progress Despite concern about declining attention to nutrition in universities and medical schools the authors offer a bright and challenging future in nutrition research and training that should generate enthusiasm among young researchers and teachers for this indispensable component of biology

The Remaking of Archival Values Victoria Hoyle, 2022-10-07 The Remaking of Archival Values posits that archival theory and practice are fields in flux and that recent critical archival discourse that addresses neoliberalism racism and the legacies of colonialism and patriarchy represents a disruption not only to established principles but also to the values that underpin them Using critical discourse analysis and comparing theory and practice from the UK and the Anglophone world Hoyle explores the challenges faced by scholars institutions organisations and practitioners in embedding new values She demonstrates how persistent underlying discursive structures about archives have manifested from the late nineteenth century to the present day Qualitative and participatory research in the UK shows how conceptions of archival value arise are expressed and become authorised in practice at international national and local levels Considering what might be learnt from similar debates in public history and cultural heritage studies the book asks if and how dominant epistemologies of the archive can be dismantled amidst systems of power that resist change The Remaking of Archival Values is relevant to researchers and students in the field of archival

and information studies as well as practitioners who work with archives around the world It will also speak to the interests of those working in the fields of cultural heritage archaeology museum studies public history and gender and race studies

The New Kinship Naomi R. Cahn,2013-01-01 No federal law in the United States requires that egg or sperm donors or recipients exchange any information with the offspring that result from the donation Donors typically enter into contracts with fertility clinics or sperm banks which promise them anonymity The parents may know the donor s hair color height IQ college and profession they may even have heard the donor s voice But they don t know the donor s name medical history or other information that might play a key role in a child s development And until recently donor conceived offspring typically didn t know that one of their biological parents was a donor But the secrecy surrounding the use of donor eggs and sperm is changing And as it does increasing numbers of

parents and donorconceived offspring are searching for others who share the same biological heritage When donors recipients and donor kids find each other they create new forms of families that exist outside of the law The New Kinship details how families are made and how bonds are created between families in the brave new world of reproductive technology Naomi Cahn a nationally recognized expert on reproductive technology and the law shows how these new kinship bonds dramatically exemplify the ongoing cultural change in how we think about family The issues Cahn explores in this book will resonate with anyone and everyone who has struggled with questions of how to define themselves in connection with their own biological legal or social families
