Service-Ability Kevin Robson, 2012-11-12 Times have changed Long gone are our days of being kings of the manufacturing industry we are now immersed in the world of service where the relationship between an organization and the customer is an integral part of the product offering The nation is suffering from a widespread lack of truly customer satisfying service We lack the very thing that we need to make this new paradigm work efficiently service ability Organizations of all kinds are facing high customer churn serious customer antagonism loss of consumer confidence and plummeting customer satisfaction Research shows that totally satisfying the customer is the only thing that will secure loyalty and offer significant competitive advantage Yet still on a daily basis we encounter service that frustrates us Whilst the emergence of technology has no doubt brought efficiency to many areas of business activity including the third sector it has led to the standardised and indifferent service we regularly receive We appear to have lost sight that people do business with people Through efficient technology our organisations may be serviceable but they are not service able The arrival of Generation Y and the developments in social media provide businesses with a whole new way to engage with their customers but also provide a new way for customers to rate companies products and services not always in a positive manner Like or Fail have become part of our social language Organizations that refocus on the need to treat customers in a way that satisfies them and not the technology will have better customer retention lower costs of replacement and will build their brand value through better reputations Service Ability delves deeply into these areas to show how today's managers need to re think the way we structure manage lead and organize our companies to achieve total customer centric work cultures that develop lasting relationships with customers

The Overworked Consumer Christopher K. Andrews, 2018-12-11 The Overworked Consumer examines how the growing use of self service technology in the U S economy has contributed to Americans feelings of busyness and overwork by asking them to perform a variety of tasks in work like settings for free Focusing on the adoption of self checkout lanes in the retail food industry the book describes how self service technology is changing the meaning of service in an economy where the boundaries between work and leisure are becoming increasingly blurred Are big businesses simply being cheap and lazy preferring to automate and outsource work to unpaid consumers instead of raising wages or is self service and its do it yourself ethos a response to consumers demands for faster easier ways of buying goods and services And what exactly are shoppers getting when they go through the self checkout lane Is it really faster than the cashier lane or just another illusory speed up meant to distract them from the realization that they are performing unpaid work unwitting participants in a new retail experiment whose roots can be traced back to the very invention of the modern supermarket And what about the effect on jobs is this the end of the checkout line for cashiers and similar forms of work or are such anxieties over automation overstated To answer these questions the author takes readers inside SuperFood a regional supermarket chain drawing upon extensive interviews with managers staff and customers as well as an array of examples retail studies and statistics to separate fact from fiction and figure out what is actually happening in stores Concluding with a cautionary tale of two grocers the author suggests the future of retailing is still undetermined meaning shoppers still have time to decide whether or not they really want to do it yourself Caveat emptor
