We Can Teach That Ewa Dziedzic-Elliott, 2024-11-28: Information literacy is a complex subject that finally arrived at the doorstep of school libraries. For decades, academic researchers have been trying to capture the essence of information literacy, its educational, cognitive and civic value. The collection of book chapters offered in *We Can Teach That* is a handbook that can be used as an inspiration for teaching various types of literacy: visual, digital, multicultural, health and more. The book asks important questions: When do we start teaching information literacy? How do we teach it? How does it affect our students at their education level? How does it prepare them for their post-high school adult life? Does it impact their transition to college or career? Dziedzic-Elliott and her collaborators provide a range of best practices and concepts that inspire thinking about teaching information literacy at all levels. Although written with school librarians in mind, the book can be easily adapted by teachers, school administrators and even public librarians who are looking to incorporate information literacy elements in their daily practices. The book challenges the reader to rethink what they know about digital or tech literacy, breaks some stereotypical concepts about multicultural literacy and highlights the importance of literacies even in adulthood.

Artificial Intelligence, Co-Creation and Creativity Francisco Tigré Moura, 2024-08-01: Artificial intelligence (AI) has deeply impacted our understanding of creativity and the human ability to generate creative outputs. New applications for creative tasks are rapidly evolving and new tools are constantly being developed with much greater optimal capabilities. Importantly, the success of implementing

such tools for creative tasks is still heavily dependent on human supervision and input. Therefore it is vital to understand and critically reflect on the nature of co-creative processes between humans and AI. This book addresses such issues and provides insights into how humans can augment their capabilities for generating creative and innovative outputs by successfully co-creating with AI. The book is intentionally divided into three main parts to allow for a comprehensive and holistic perspective on human and AI co-creation for creative tasks. The sections are divided as follows: Part 1: Principles of AI and Creativity; Part 2: Critical Issues on Artificial Co-Creation; and Part 3: Industry-Specific Discussions. Consequently, the book provides a holistic insight on the topic, covering various issues and perspectives, and enabling an accessible read to a broad audience. For example, chapters cover examples across different industry sectors including music, arts, science, and management. Furthermore, the book covers critical questions involving copyrights, ethical concerns, relationship with algorithms, and context-based issues. Only by critically reflecting on the intrinsic issues of AI and learning how to work with it effectively for creative purposes will we be able to benefit from its full potential to augment human creative abilities in an appropriate manner. This novel edited collection is an essential read for scholars working on the intersection of AI, creativity, arts, and management.

Arts-Based Multiliteracies for Teaching and Learning Peters, Beryl, 2024-10-17. The current educational landscape demands more than traditional literacy skills to equip learners with the necessary tools to thrive in the modern world. The traditional focus on reading and writing print text may not be sufficient to comprehend the diverse forms of meaning-making necessary for effective communication and understanding in diverse communities. This poses a crucial challenge for educators who aspire to foster engaged and critically aware learners who can navigate the complexities of contemporary society. *Arts-Based Multiliteracies for Teaching and Learning* offers a transformative solution by advocating for a pedagogy of multiliteracies centered on arts-based approaches. By redefining literacy to encompass diverse modalities such as dance, drama, music, visual arts, and multi-media, this book challenges educators to expand their understanding of literacy beyond traditional boundaries. The book provides a compelling rationale for integrating arts-based multiliteracies across all levels and curricular areas.
