PrestaShop 1.5 Beginner's Guide John Horton Jose A. Tizon, 2013-04-24 This book is written in a friendly voice with lots of tips tricks and screenshots to help you set up extend and personalize your own online shop If you want to start your own e commerce business then this book will help you do that This book is for people who are interested in creating an online shop Basic HTML and CSS skills would be beneficial but are not required as we will provide you with all the code and know how you need Access to Justice in Transnational B2C E-Commerce Sutatip Yuthayotin, 2014-11-17 This book identifies

institutional mechanisms that can be used to promote consumer confidence in direct online sales with businesses B2C e commerce It argues that enhancing the access to justice in a multidimensional sense can potentially offer an effective means of boosting consumer confidence It introduces a conceptual framework for a multidimensional approach to access to justice in the context of consumer protection describing the various reasonable criteria needed to satisfy consumer demands in B2C e commerce The framework which reflects all essential aspects of consumers expectations when they engage in online transactions provides a benchmark for the evaluation of various consumer protection mechanisms Based on an analysis of different mechanisms and using the framework s criteria the practice of private ordering which does not rely on the creation of rules of law but rather on the use of technology as a solution appears to offer a meaningful way to enhance access to justice in B2C e commerce However though private ordering holds considerable potential certain weaknesses still need to be eliminated This book demonstrates how private ordering can be successfully implemented with the help of an intermediary a neutral third party that plays an integral part in the collaborative task of facilitating various aspects of private ordering thus helping to limit the risks of failure and ensuring a fairer market setting In order to move forward it argues that the state with its wealth of material resources and incentive options is the institution best suited to acting as an intermediary in facilitating private ordering This promising proposal can improve consumer protection which will in turn boost consumer confidence
