Transnational Crime Jessica Roher, Nicola Guarda, Maryam Khalid, 2018-09-03 Philip Jessup coined the term transnational law in his Storrs Lecture on Jurisprudence delivered in 1956 to describe law that regulates activities or actions that transcend national borders The term redefined the development and practice of the law and became a distinct field of study In 2001 Neil Boister applied Jessup's concept to the field of criminal law and identified the emergence of transnational criminal law in a formative article published in the European Journal of International Law Inspired by Boister's work the editors of the journal Transnational Legal Theory sought contributions from leading academics and practitioners for a symposium issue on transnational criminal law In their papers the authors built upon and developed novel approaches to legal issues arising in an increasingly globalized world where both crimes and the regulation of crimes transcend borders The publication of this book marks the sixtieth anniversary of Jessup's seminal lecture and exemplifies the significant impact that Jessup and later Boister have had on legal scholarship and practice in the area of criminal law We are honoured to publish the symposium as a monograph and to contribute to this rapidly evolving field This book was previously published as a special issue of Transnational Legal Theory

Interdisciplinarity Didi Herman, Connal Parsley, 2022-02-23 This book illuminates methodology in legal research by bringing together interdisciplinary scholars who employ a diverse set of methodologies to address a specific shared research challenge the body The contributors were asked a question if you were invited to contribute to an edited book on the body where would you start and then where would you go The result is a self reflective discussion of how and where researchers

engage with methodological practices The contributors draw on their own interdisciplinary research experiences to explore how the body might be addressed in their work and the resources they would deploy in order to carry out the task This book within a book is innovative in both content and format It provides a rare insight into how top interdisciplinary legal scholars go about making decisions about their research The shared device of the body allows the volume to trace a number of rich approaches into the process of research as practiced by these diverse scholars In presenting thinking and research in action the volume offers a new self reflective view on the much addressed theme of the body as well as taking a fresh approach to the historically vexed problem of research methodology in legal studies

Vulnerability and the Organisation of Academic Labour Graham Ferris, Martha Albertson Fineman, 2024-09-20 Vulnerability theory identifies structural and institutional factors that build or undermine the resilience of individuals and organisations This volume uses vulnerability theory to explore how the organisation of the teaching and research activities of universities impact the resilience of academics and also how these activities themselves are impacted by contemporary developments in universities and educational policy The starting point of enquiry is that neither academics nor universities are invulnerable and that urgent attention is needed to reverse developments that undermine their resilience The contributions focus on universities in the US and UK legal education in the UK criminal justice in the UK Brazilian legal education research in deprived communities and the ethics of medical professionals This broad range of subjects is connected by use of vulnerability theory to interrogate academic practices and universities as organisations which should build resilience in their workforce and communities and in so doing secure their own resilience but which far too often fail to do so and actually undermine resilience It is argued this is not due to malefic intentions but to institutional features of the sector and society Of immediate interest to anyone who works in studies at or relies upon the research mission of universities and to those involved in the management of universities this book will also be relevant to policy analysts and policymakers who will find value in the reframing of vital issues in higher education policy by vulnerability theory allowing a more realistic and productive policy environment to develop This book was originally published as a special issue of *The Law Teacher*

Law's Memories Matt Howard, 2022-12-02 This book discusses the relationship between law and memory and explores the ways in which memory can be thought of as contributing to legal socialization and legal meaning making Against a backdrop of critical legal pluralism which examines the distributedness of law s this book introduces the notion of mnemonic legality It emphasises memory as a resource of law rather than an object of law on the basis of how it substantiates senses of belonging and comes to frame inclusions and exclusions from a national community on the basis of linear trajectory and growth narratives of nationhood Overall it explores the sensorial and affective foundations of law implicating memory and perceptions of belonging within this process of creating legality and legitimacy By identifying how memory comes to shape and inform notions of law it contributes to legal consciousness research and to important questions informing much socio legal research
