

Before you begin

Thank you for purchasing the Bose® Wave® radio.

Customer support is provided by Bose Corporation. Being able to identify its products correctly promotes proper handling, which can extend "lifetime" of the Bose® product.

Using this technology, it takes virtually anything away from a small loudspeaker to the outside or over a wide range of loud speakers. Therefore it is the best way to improve the sound of your radio, making the listening more fun, because music being heard is better, not less.

Features

See Wave radio and manual.

- Integrated system design for superior quality without component adjustments
- A high-performance stereo tuner — offers up to 5 AM and 5 FM station presets
- Two independent dials, with battery backup power for remember settings
- A credit card size remote control with recording time provided
- Input for an additional sound source, such as a CD or tape player

Please use the steps to follow this owner's guide carefully. It helps you set up the receiver and radio and enjoy all of its features and high-fidelity sound.

Setting Up

Unpacking the station

Check the station and its contents. There is nothing outside the package for you. The original packing materials inside the station are to protect your Wave® radio. They protect the station against damage. Do not discard them. They show "Customer Service" should there be any other problem in the future.

Check to see your Wave radio matches the photo illustration in Figure 1.

- 2 **Note:** Find the serial number on the bottom of your radio. Write it down. Record it and in the label attached to Figure 1.

Selecting a location for your radio

Please read these guidelines in mind when selecting a location for your radio.

- Place the radio on a table or other flat surface.
- Do not use the radio in a damp location. It is important to prevent moisture from getting into the unit.
- Do not place it on a metal surface or table that could interfere with AM reception.
- Since all electronic equipment generates some heat, do not place it on a heat sensitive surface.
- If you use the radio with your television or VCR, do not place it directly in front of the television. It may interfere with the picture quality.
- A wooden surface may help if a radio is recommended for best sound performance.
- You get the maximum sound from your radio if you are able to place the radio across the room from where you will be listening.

Please adjust the location to get the sound you prefer.
