Resisting Postmodern Architecture Stylianos Giamarellos, 2022-01-10 Since its first appearance in 1981 critical regionalism has enjoyed a celebrated worldwide reception. The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation. Today its main principles such as acknowledging the climate, history, materials, culture and topography of a specific place are integrated in architects' education across the globe. But at the same time the richer cross-cultural history of critical regionalism has been reduced to schematic juxtapositions of the global with the local. Retrieving both the globalising branches and the overlooked cross-cultural roots of critical regionalism, *Resisting Postmodern Architecture* resituates critical regionalism within the wider framework of debates around postmodern architecture, the diverse contexts from which it emerged and the cultural media complex that conditioned its reception. In so doing it explores the intersection of three areas of growing historical and theoretical interest: postmodernism, critical regionalism and globalisation. Based on more than 50 interviews and previously unpublished archival material from six countries, the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship. In so doing it shows how the periphery was not just a passive recipient but also an active generator of architectural theory and practice. Stylianos Giamarellos challenges long-held central notions of supposedly international discourses of the recent past and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory, history and historiography.

Designing in Dark Times Virginia Tassinari, Eduardo Staszowski, 2020-11-12 The architectural historian and critic Kenneth Frampton never recovered from the force of Hannah Arendt's teaching at The New School in New York. The philosopher Richard J. Bernstein considers her the most perceptive political theorist and observer of dark times, a concept which drawing from Brecht she made her own. Building on the revival of interest in Hannah Arendt and on the increasing turn in design towards the expanded field of the social, this unique book uses insights and quotations drawn from Arendt's major writings: *The Human Condition*, *The Origins of Totalitarianism*, *Men in Dark Times* to assemble a new kind of lexicon for politics, designing and acting today. Taking 56 terms from *Action*, *Beginnings and Creativity*, *Mortality*, *Nativity and Play* to *Superfluity*, *Technology* and *Violence* and inviting designers and scholars of design world-wide to contribute, *Designing in Dark Times: An Arendtian Lexicon* offers up an extraordinary range of short essays that use moments and quotations from Arendt's thought as the starting points for reflection on how these terms can be conceived for contemporary design and political praxis. Neither simply dictionary nor glossary, the lexicon brings together designing and political philosophy to begin to create a new language for acting and designing against dark times.

Race and Modern Architecture Irene Cheng, Charles L. Davis II, Mabel O. Wilson, 2020-05-26 Although race, a concept of human difference that establishes hierarchies of power and domination, has played a critical role in the development of modern architectural discourse and practice since the Enlightenment, its influence on the discipline

remains largely underexplored This volume offers a welcome and long awaited intervention for the field by shining a spotlight on constructions of race and their impact on architecture and theory in Europe and North America and across various global contexts since the eighteenth century Challenging us to write race back into architectural history contributors confront how racial thinking has intimately shaped some of the key concepts of modern architecture and culture over time including freedom revolution character national and indigenous style progress hybridity climate representation and radicalism By analyzing how architecture has intersected with histories of slavery colonialism and inequality from eighteenth century neoclassical governmental buildings to present day housing projects for immigrants Race and Modern Architecture challenges complicates and revises the standard association of modern architecture with a universal project of emancipation and progress
