Book Energy Revolution Guide Repowering System:

Energy Revolution Howard Johns, 2015 We need a global energy revolution In developed nations we are wasting massive quantities of energy providing heat and light to our homes and businesses while one and a half billion people have no access to electricity at all The existing central power station model is based on old technology that spews carbon energy and money straight up the chimney Energy Revolution shows us how we can change all of this Telling stories from around the world of the change that s already happening and drawing on two decades of his own unique experience Howard Johns demonstrates how we can develop our own renewable energy projects to provide local energy and create a new fleet of businesses He shows us how communities can build local energy solutions renewable power stations that will be a new form of building society where we come together to develop finance and construct the infrastructure that we and future generations so desperately need Howard Johns explains how to design set up and fund community energy systems citing examples from countries that already have cut the amount of energy they use and supply their needs from renewable energy These new systems will create new jobs and businesses reduce energy imports and create new local investment models This handbook contains the map we need to change the system from the bottom up and make the next great leap forward to achieving clean affordable energy It covers everything needed to structure your community power company the technology site assessment legal and business planning fundraising and financial modeling and putting people at the heart of your strategy It s time to take control re localize reduce costs and carbon emissions and join the energy revolution

Repowering Communities Prashant Vaze, Stephen Tindale, 2014-01-14 Energy policy is at a crossroads Attempts to meet targets for carbon emissions energy security and affordable energy for vulnerable households are all on a trajectory to failure Aggressive ambitions to roll out huge off shore wind nuclear and clean coal plants are proposed but without any clear plans on how funds will be mobilized or transmission and distribution infrastructure developed In this book Prashant Vaze and Stephen Tindale ask politicians and regulators to consider a different path Using abundant examples of small scale local solutions Repowering Communities examines how cities communities and local authorities from across Europe and North America have driven reductions in energy use and rolled out small scale community level solutions Among the issues examined are the drivers behind behavioural change the methods used to secure necessary investment and what government and civil society can do to foster such action on a wide scale Based on extensive first hand research and drawing on the latest global energy data the authors provide essential information and inspiration for readers who wish to drive the policies that encourage community level energy development

Subject Guide to Books in Print , 1997 **Energy Abstracts for Policy Analysis** , 1983 Wind Energy For the Rest of Us Paul Gipe, 2018-05-04 **The Green Bubble** Robert Bell, 2006

The next four years will be an increasingly frenzied lead up to a gigantic stock market bubble in renewable energy The new energy revolution will have a profound impact on everything that human beings construct move or deliberately heat or cool

The consequences of the first truly global stock market bubble will transform every country every industry and nearly every business This book will act as a road map for the new energy revolution It will serve as a guide to understanding the rapidly unfolding events as well as a business reference for individual and institutional investors and for government policy advisors The Green Bubble explains why huge global political and economic changes will occur what changes will be promoted and who will promote them in short who will gain and who will lose But after the bubble bursts most of the investors in the bubble those who did not get out in time and numbering perhaps a billion or more will have lost a material amount of their life savings Some will have invested individually others through their pension funds still others through their government s tax money and finally quite a few through ail of the above And what of the outcome A World War magnitude of invested money will actually have paid for the transformation out of oil and into renewable energy The result the climate will probably have been saved and there will be nearly limitless energy But it will have virtually no monetary value Energy will be too cheap to meter Readers of The Green Bubble will learn about the new energy revolution and will discover what works and what doesn t and why they will have to watch their investments closely especially those made by others on their behalf
