The Hundred-Year Marathon Michael Pillsbury, 2015-02-03 One of the U S government s leading China experts reveals the hidden strategy fueling that country s rise and how Americans have been seduced into helping China overtake us as the world s leading superpower For more than forty years the United States has played an indispensable role helping the Chinese government build a booming economy develop its scientific and military capabilities and take its place on the world stage in the belief that China s rise will bring us cooperation diplomacy and free trade But what if the China Dream is to replace us just as America replaced the British Empire without firing a shot Based on interviews with Chinese defectors and newly declassified previously undisclosed national security documents *The Hundred Year Marathon* reveals China s secret strategy to supplant the United States as the world s dominant power and to do so by 2049 the one hundredth anniversary of the founding of the People s Republic Michael Pillsbury a fluent Mandarin speaker who has served in senior national security positions in the U S government since the days of Richard Nixon and Henry Kissinger draws on his decades of contact with the hawks in China s military and intelligence agencies and translates their documents speeches and books to show how the teachings of traditional Chinese statecraft underpin their actions He offers an inside look at how the Chinese really view America and its leaders as barbarians who will be the architects of their own demise Pillsbury also explains how the U S government has helped sometimes unwittingly and sometimes deliberately to make this China Dream come true and he calls for the United States to implement a new more competitive strategy toward China as it really is and not as we might wish it to be *The Hundred Year Marathon* is a wake up call as we face the greatest national security challenge of the twenty first century

SUMMARY - the Hundred-Year Marathon: China's Secret Strategy to Replace America As the Global Superpower by Michael Pillsbury Shortcut Edition,2021-01-12 Our summary is short, simple, and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. By reading this summary, you will discover how China aspires to become a global superpower by following the strategic plan of the Hundred Years Marathon. You will also discover that the Chinese Communist Party is following in the footsteps of the country's ancient dynasties, the key points of the Hundred Years Marathon, what China's lobbying of foreign leaders and media looks like, what the world would look like under Chinese rule, how the U.S. can respond to this strategy. While it was on the winning side at the end of World War II, China was in great economic difficulty. The country then experienced a civil war between 1945 and 1949 which pitted Mao Zedong's Chinese Communist Party against Chiang Kai-shek's Nationalist Party. In the end, it was the Communist camp that won, leading to the creation of the People's Republic of China in October 1949. Since that time, the party leaders, also known as the Chinese Falcons, have implemented a strategy, the Hundred Years Marathon. The aim of this plan is to avenge China's political and economic humiliations of the past century. Thus, the country gives itself until 2049 to dominate the world economically and geopolitically in place of the United States. How does China intend to do this? SUMMARY Edition Shortcut (author),1901 [Why Is The China Model Losing Its Power? - Challenges And Opportunities Of The Second](#)

Global Competition Jinghao Zhou, 2020-07-23 History has proved that communism failed at many levels during the first global competition between the capitalist and socialist camps during the Cold War As a result the socialist camp was dissolved China is one of the few communist countries to survive in the twenty first century The Chinese economy was on the verge of collapse in the 1970s but began to take off in the early 1980s guided by the China model China became the world s second largest economy in 2010 and has quickly expanded its enormous global market and political influence The second global competition between the capitalist countries and China has started The second global competition is in fact between the China model and the Washington Consensus Will Western hegemonies end as the result of the second global competition Will China be able to rewrite the international rules Will the Chinese communist political system collapse during the competition What should the West do to the China model This book will explore the implications of the China model in the context of the second global competition and argues that the downturn of the China model and China s global expansion are the two sides of the same coin The China model is losing its power but not broken China would be able to become even stronger if it could reshape the philosophical foundation of the China model The future of Western hegemony will depend on how the West understands the China model and deals with it This book addresses these aspects and more *Professional Journal of the United States Army*, 2019-09 **Military Review**, 2019 **Borderless by Design** Troy E. Nehls, 2024-01-09 In his previous book *The Big Fraud* Congressman Troy Nehls exposed the deep corruption perpetrated by the Democrats in the 2020 election Now in *Borderless by Design* he examines what s really happening with the Biden administration s destruction of America s southern border The Democrats and their deep state supporters want to cement permanent political power in Washington DC Having turned their backs on their traditional voters middle class blue collar Americans the Democrats have a desperate need to replenish their voter base That s why the Biden administration purposely acting against the Constitution and our country s laws is flooding our border with illegals Regardless of the harm done to America and to illegals themselves Democrats consider the power grab worth the collateral damage If that weren t bad enough the Democrats open border policies also aid and abet those who are trying to destroy America from George Soros and Davos Man to China and the Mexican drug cartels **Shifting Power in Asia-Pacific?** Enrico Fels, 2016-11-03 This book investigates whether a power shift has taken place in the Asia Pacific region since the end of the Cold War By systematically examining the development of power dynamics in Asia Pacific it challenges the notion that a wealthier and militarily more powerful China is automatically turning the regional tides in its favour With a special emphasis on Sino US competition the book explores the alleged linkage between the regional distribution of relevant material and immaterial capabilities national power and the much cited regional power shift The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power CIAP that includes 55 variables for 44 regional countries and covers a period of twenty years Moreover it develops a middle power theory that outlines the significance of middle powers in times of major power shifts By

addressing political military and economic cooperation via a structured focused comparison and by applying a comparative historical analysis the book analyses in depth the bilateral relations of six regional middle powers to Washington and Beijing

America's Two Cold Wars Alfredo Toro Hardy, 2022-03-20 This book focuses on ascertaining what distinguishes the Cold War that the U S sustained with the USSR from the one now emerging with China By comparing their characteristics it elaborates on how well prepared the US is to undertake this fresh challenge In doing so the book analyses six fundamental differences between both cold wars ideology alliances strategic consistency military economics and containment While the configuration of factors benefited the US during its first Cold War they now point in the opposite direction While the first Cold War was instrumental in projecting the US to the pinnacle the second can only accelerate its dwindling **The Impact**

of China's Belt and Road Initiative Jeremy Garlick, 2019-11-15 This book merges macro and micro level analysis of the Belt and Road Initiative BRI to dissect China's aim in creating an integrated Eurasian continent through this single mega project BRI has been the source of much interest and confusion as established frameworks of analysis seek to understand China's intentions behind the policy China's international activity in the early 21st century has not yet been successfully theorised by IR scholars because of a failure to satisfactorily encompass its complexity In addition the mix and match syncretism of the Chinese approach to foreign policy has been under emphasised or omitted in many analyses Bringing together complexity thinking and analytic eclecticism to assess the degree to which this scheme can transform international relations Garlick critically examines this large scale interconnectivity project and its potential impacts The book will be of interest to scholars and practitioners in the field of international relations and China studies including academics policy makers and diplomats around the world *Great Powers, Grand Strategies* Anders Corr, 2018-01-15

Great Powers, Grand Strategies offers the analysis of a dozen experts on the big picture approaches to the South China Sea dispute By exploring the international dimensions of this regional hotspot Gordon Chang Bernard Cole James Fanell Bill Hayton and others examine how the military diplomatic and economic strategies of the major global actors have both contributed to solutions and exacerbated the potential for conflict As editor of this volume Anders Corr seeks to juxtapose the grand strategies of the great powers to determine the likely outcomes of the South China Sea dispute as well as evaluate the ways to possibly defuse tensions in the region **The Peacemakers** Bruce W. Jentleson, 2018-04-24

In the twentieth century great leaders played vital roles in making the world a fairer and more peaceful place How did they do it What lessons can be drawn for the twenty first century global agenda Those questions are at the heart of *The Peacemakers* a kind of global edition of John F Kennedy's *Profiles in Courage* Writing at a time when peace seems elusive and conflict endemic when tensions are running high among the major powers when history has come roaring back when democracy and human rights are yet again under siege when climate change is moving from future to present tense and when transformational statesmanship is so needed Bruce W Jentleson shows how twentieth century leaders of a variety of types national international institutional sociopolitical

nongovernmental rewrote the zero sum scripts they were handed and successfully made breakthroughs on issues long thought intractable The stories are fascinating Henry Kissinger Zhou Enlai and the U S China opening Mikhail Gorbachev and the end of the Cold War Dag Hammarskjöld's exceptional effectiveness as United Nations secretary general Nelson Mandela and South African reconciliation Yitzhak Rabin seeking Arab Israeli peace Mahatma Gandhi as exemplar of anticolonialism and an apostle of nonviolence Lech Walesa and ending Soviet bloc communism Gro Harlem Brundtland and fostering global sustainability and a number of others While also taking into account other actors and factors Jentleson tells us who each leader was as an individual why they made the choices they did how they pursued their goals and what they were and weren't able to achieve And not just fascinating but also instructive Jentleson draws out lessons across the twenty first century global agenda making clear how difficult peacemaking is while powerfully demonstrating that it has been possible and urgently stressing how necessary it is today An ambitious book for ambitious people The Peacemakers seeks to contribute to motivating and shaping the breakthroughs on which our future so greatly depends **The Logic of Irregular**

War Ilan Berman, 2017-11-10 For the United States asymmetric warfare has emerged as the new normal The large scale conventional campaigns that typified U S military engagements for much of the 20th Century are increasingly things of the past Instead the quarter century since the end of the Cold War and the collapse of the U S Soviet balance of power has seen irregular war truly come of age with more and more hostile nations pursuing asymmetric means in order to secure the strategic advantage vis vis the United States In this volume a group of leading national security practitioners and subject matter experts comes together to analyze the asymmetric strategies being pursued today by America's main state based adversaries Russia China Iran and North Korea and to explore how U S policymakers can respond more effectively to them

Advantage China Jeremy Garlick, 2023-10-05 The influence of the People's Republic of China on world affairs is increasingly keenly felt in Asia in Africa in Latin America and in Europe and North America too But what are the reasons for China's rise and how can the West adapt Advantage China explores these essential questions and the political economic and cultural factors behind the answers From the economic and demographic pressures of China's domestic economy to the expanding economic influence of the Belt and Road Initiative Jeremy Garlick looks beyond Western misperceptions of China's rise to argue for new approaches to the international political order particularly in the wake of the COVID 19 pandemic

The Kill Chain Christian Brose, 2020-04-21 From a former senior advisor to Senator John McCain comes an urgent wake up call about how new technologies are threatening America's military might For generations of Americans our country has been the world's dominant military power How the US military fights and the systems and weapons that it fights with have been uncontested That old reality however is rapidly deteriorating America's traditional sources of power are eroding amid the emergence of new technologies and the growing military threat posed by rivals such as China America is at grave risk of losing a future war As Christian Brose reveals in this urgent wake up call the future will be defined by artificial intelligence

autonomous systems and other emerging technologies that are revolutionizing global industries and are now poised to overturn the model of American defense This fascinating if disturbing book confronts the existential risks on the horizon charting a way for America's military to adapt and succeed with new thinking as well as new technology America must build a battle network of systems that enables people to rapidly understand threats make decisions and take military actions the process known as the kill chain Examining threats from China Russia and elsewhere The Kill Chain offers hope and ultimately insights on how America can apply advanced technologies to prevent war deter aggression and maintain peace

China, the Belt and Road Initiative, and the Century of Great Migration Michele Bruni, 2022-04-13 The book argues whether future migrations will be organized by destination countries or by criminal organizations whether migrants will travel in a humane way or will continue to die along the road whether properly trained migrants will boost the productivity of arrival countries or these countries will continue to squander money to build useless walls possibly far from their border and pay neighbours not certainly in the top list from the human right perspective to keep workers they need in concentration camps It suggests that it is in the interest of more developed countries to stop denying their structural shortage of labour and start co managing with one or more potential departure countries migration flows coherent with the quantitative and qualitative needs of their labour market Economic fairness and sound economic thinking would also require destination countries to finance the training of potential migrants in the country of departure in substance to build schools and vocational centres not walls China represents an ideal case study in this regard not only because of its history institutional setting and international relationships but because in the next decades it will be the country most affected by the largest shortage of labour

The Beautiful Country and the Middle Kingdom John Pomfret, 2016-11-29 A remarkable history of the two centuries old relationship between the United States and China from the Revolutionary War to the present day From the clipper ships that ventured to Canton hauling cargos of American ginseng to swap Chinese tea to the US warships facing off against China's growing navy in the South China Sea from the Yankee missionaries who brought Christianity and education to China to the Chinese who built the American West the United States and China have always been dramatically intertwined For more than two centuries American and Chinese statesmen merchants missionaries and adventurers men and women

have profoundly influenced the fate of these nations While we tend to think of America s ties with China as starting in 1972 with the visit of President Richard Nixon to China the patterns rapturous enchantment followed by angry disillusionment were set in motion hundreds of years earlier Drawing on personal letters diaries memoirs government documents and contemporary news reports John Pomfret reconstructs the surprising tragic and marvelous ways Americans and Chinese have engaged with one another through the centuries A fascinating and thrilling account The Beautiful Country and the Middle Kingdom is also an indispensable book for understanding the most important and often the most perplexing relationship between any two countries in the world
