The Internet and Instruction Ann E. Barron, Karen S. Ivers, 1998-06-15 Students can explore a variety of subjects with these cross curricular Internet activities Designed for educators and students this guide to telecommunications and the Internet demystifies the technology and provides relevant feasible and easy to implement ideas and activities for the classroom Expanded coverage of Web resources and cross curricular activities are available in this new edition Projects arranged by subject area encourage students to explore the Internet and help them learn in a variety of areas All activities are presented in reproducible format and are readily integrated into the curriculum The authors also give a basic overview of Internet access and navigation A glossary index Internet resource list and illustrations complete the work *Green Mobile Devices and Networks* Hrishikesh Venkataraman, Gabriel-Miro Muntean, 2016-04-19 While battery capacity is often insufficient to keep up with the power demanding features of the latest mobile devices powering the functional advancement of wireless devices requires a revolution in the concept of battery life and recharge capability Future handheld devices and wireless networks should be able to recharge themselves automaticall *Information Centric Networks (ICN)* Nitul Dutta, Hiren Kumar Deva Sarma, Rajendrasinh Jadeja, Krishna Delvadia, Gheorghita Ghinea, 2021-08-27 This book aimed at bringing an insight to the ICN network particularly various architectures issues and challenges in the new networking paradigm The book starts with an introduction to the new promising concept of ICN and its origin along with the reason behind this interesting innovation Different architectures proposed so far in support of implementing the ICN is also discussed in details Few of the challenges of ICN implementation are enlisted as caching naming routing and security Each of these challenges with recent development is covered in individual chapters Moreover integration of current trends in communication and computing like software defined networking and machine learning approach are another area that this book is focusing All these chapters highlight the recent developments reported in the area and also discusses the future trends The book provides an overview of the recent developments in future internet technologies bringing together the advancements that have been made in ICN The book includes three unique chapters in the field of ICN research The first is the SDN framework for implementing ICN by decoupling data and control plan The machine learning models for predicting future trends in network traffic and other management activities is another important chapter This chapter includes the possibilities of using machine learning models for trend prediction to help network administrators and service providers to take care of unexpected sudden change traffic pattern and user behaviour The third most vital chapter is the security issues in ICN This chapter includes various facts that influences the security of ICN Issues involved in naming caching and routing are discussed separately along with few recent works in these areas Various types of attacks in ICN are also part of the discussion The stated book would be useful for researchers in this area and will work as a reference for future work Moreover the content of the book would also be suitable as a supporting material for undergraduate and graduate level

courses in computer science and electrical engineering Wireless Sensor Networks Bhaskar Krishnamachari, 2010-03-02 This book constitutes the refereed proceedings of the 7th European Conference on Wireless Sensor Networks EWSN 2010 held in Coimbra Portugal in February 2010 The 21 revised full papers presented were carefully reviewed and selected from 109 submissions Topics of interest include hardware design and implementation operating systems and software middleware and macroprogramming communication and network protocols information and signal processing fundamental theoretical limits and algorithms prototypes field experiments testbeds novel applications including urban sensing security and fault tolerance The papers are organized in topical sections on localization synchronization and compression networking new directions programming and architecture as well as on link reliability Optimization Methods in Mobile Communication Systems Milind Pande, Anand J. Kulkarni, Apoorva S. Shastri, 2025-10-22 This book presents the result of an innovative challenge to create a systematic literature overview driven by machine generated content This machine generated volume with chapter introductions by the human expert of summaries of the existing studies furthers our understanding of the optimization methods in mobile communication systems The book provides a machine generated comprehensive yet classified review of the optimization methods techniques and approaches associated with different mobile communications and systems including wavelet based CR OFDM systems MIMO slot antenna with low mutual coupling for 5G networks etc It also covers mainly the techniques for performance analysis of MIMO systems such as the hybrid filtering technique for MIMO OFDM systems and artificial intelligence solutions beyond 5G radio access networks Questions and related keywords were prepared for the machine to query discover collate and structure by Artificial Intelligence AI clustering The AI based approach seemed especially suitable to provide an innovative perspective as the topics are indeed both complex interdisciplinary and multidisciplinary Springer Nature has published much on these topics in its journals over the years so the challenge was for the machine to identify the most relevant content and present it in a structured way that the reader would find useful The automatically generated literature summaries in this book are intended as a springboard to further discoverability They are particularly useful to readers with limited time looking to learn more about the subject quickly and especially if they are new to the topics Springer Nature seeks to support anyone who needs a fast and effective start in their content discovery journey from the undergraduate student exploring interdisciplinary content to Master or PhD thesis developing research questions to the practitioner seeking support materials this book can serve as an inspiration to name a few examples It is important to us as a publisher to make advances in technology easily accessible to our authors and find new ways of AI based author services that allow human machine interaction to generate readable usable collated research content Internet and Network Economics Stefano Leonardi, 2009-12-07 This book constitutes the refereed proceedings of the 5th International Workshop on Internet and Network Economics WINE 2009 held in Rome Italy in December 2009 The 34 regular and 29 short revised full papers presented together with 3 invited talks were carefully reviewed and selected from 142 submissions The papers

Advancing Edge Artificial Intelligence Ovidiu Vermesan, Dave Marples, 2024-03-04 The intersection of AI the Internet of Things IoT and edge computing has kindled the edge AI revolution that promises to redefine how we perceive and interact with the physical world through intelligent devices Edge AI moves intelligence from the network centre to the devices at its edge entrusting these endpoints to analyse data locally make decisions and provide real time responses Recent advances in power efficient high performance embedded silicon make edge AI a viable proposition albeit one requiring new distributed architectures and novel design concepts Moving decision making closer to the edge makes responses faster and systems more reliable while the constant pressure to reduce network bandwidth demand and the need to contain spiralling data storage and operations costs help justify the engineering investment necessary to embrace this new paradigm Moving to decentralised operation opens the door to a multitude of novel applications covering immersive technologies and autonomous systems across fields as diverse as healthcare and industrial automation personal assistance and prognostics surgery and process control In the best tradition of systems engineering the first stage of this transition process is understanding the application domain for edge AI deployment the system context This book presents some key topics and early thinking from the EdgeAI project covering data backhaul technologies lifecycle management mechanisms for developing AIs at the edge and techniques for interacting with those AIs It provides examples of application domains before concluding with a review of how edge AI systems can be understood by their users It also examines and presents new results based on current investigations and activities in edge AI technologies considering the future trends in autonomic systems hyperautomation AI engineering generative AI connectivity and cybersecurity mesh This book aims to empower the reader with the knowledge and insights needed to understand and embrace the transformative power of edge AI technology The extensively referenced chapters contributed by experts and thought leaders in the field are recommended to anyone interested in developing edge AI systems Edge AI Technologies for Optimised Performance Embedded Processing EdgeAI Key Digital Technologies KDT Joint Undertaking JU European research project <https://edge-ai.tech.eu>
