automated copyright filtering The author develops an economic model of the competition between right holders and copyright infringing uploaders on a platform Furthermore he applies insights from the economic literature on decision making under uncertainty and incentive alignment to automated copyright filtering The analysis disentangles complex relationships and challenges prevailing assumptions It offers a novel perspective on the implications of automated filtering for the objectives of copyright policy on the avoidance of erroneous filtering decisions and on regulatory approaches to automated filtering The author employs his findings to evaluate the current US and EU legal frameworks and proposes improvements This book will appeal to researchers and policy makers interested in automated filtering copyright enforcement and platform regulation
