Pamphlet Architecture 27 Tooling:

Pamphlet Architecture 27: Tooling Benjamin Aranda, Chris Lasch, 2006 We all know that today's architectural design has moved from the sketchpad to the screen the era of the Mayline and the drafting board now seems downright Paleolithic but techniques for using the computer not just as a tool for rendering but as a generative instrument remain woefully unexplored The technologically progressive young firm Aranda Lasch illustrates how advanced computational methods and algorithmic codes can be used to foster architectural design Tooling explores patterns generated by computer codes that in turn create an organizational template assembling projects By openly sharing these codes the authors seek to foster further investigation into their methods allowing other architects to model and evolve more critical and insightful geometries and patterns

Pamphlet Architecture 29 Nannette Jackowski, Ricardo de Ostos, 2013-07-02 Ambiguous Spaces the newest installment in the Pamphlet Architecture series and a return to Pamphlet's own progressive roots features the architectural fictions The Pregnant Island and Nuclear Breeding These two projects develop alternative urban concepts that address the challenges presented by the specific situations and social dynamics described in controversial locations such as the Brazilian Tucuruí Dam the Three Gorges Dam in China and former English nuclear test sites Using narrative techniques fictional programs ambiguous spaces and building devices Ambiguous Spaces explores people communities and even entire cities oppressed by a lack of freedom

Pamphlet Architecture 28 Mark Smout, Laura Allen, 2013-07-02 In 1977 Steven Holl and William Stout created a grittier alternative to mainstream architectural publishing called Pamphlet Architecture With Holl's Bridges the landmark series was born and for 30 years Pamphlet has served as soapbox and laboratory for such notable architects and theorists as Lebbeus Woods Zaha Hadid Lars Lerup and Michael Sorkin With its twenty eighth installment Pamphlet Architecture celebrates its thirtieth anniversary no less bold than when it began Augmented Landscapes features a landscape architecture practice for the first time in Pamphlet history London's Smout Allen presents five projects that respond to the way in which man has enlarged the landscape through architecture and infrastructure manipulating and blurring perceptions of what is natural and what is artificial

Pamphlet Architecture 36 Christopher Michael Meyer, Shawna Michelle Meyer, Daniel Hemmendinger, 2018-08-28 This newest addition to the Pamphlet Architecture series long admired for its willingness to propose architectural solutions to challenging problems addresses the issue of rising sea levels with an interrogation of the concept of floating cities a field of inquiry gaining increasing relevance and urgency with the impending reality of climate change The authors explore notions of buoyancy and the amphibious through a typology based on human response and adaptation to one of the hosting pressing issues of our day

Pamphlet Architecture 30 InfraNet Lab / Lateral Office, 2013-07-02 Participants in the Pamphlet Architecture 30 competition were asked to respond to the theme Investigations in Infrastructure and propose new directions for architecture transportation energy cities and agriculture at a continental scale The winning entry Coupling imagined six daring projects a high speed rail system across the Bering Strait

that also collects freshwater from the seasonal iceshelf a decommissioned airport transformed into a geothermal data farm and agriculture site thickening on off ramps around big box stores into circular parking lots a call to include landfills in the list of preserved open spaces and a saline terminal lake turned into a water farm recreational retreat and habitat haven Coupling argues that infrastructures behave as artificially maintained natural systems Rather than a New Deal approach of massive engineering or iconic infrastructure Coupling employs adaptable responsive small scale interventions whose impacts are global in scale
