**Public Service and Good Governance for the Twenty-First Century** James L. Perry, 2020-05-01 Expert analysis of American governance challenges and recommendations for reform Two big ideas serve as the catalyst for the essays collected in this book The first is the state of governance in the United States which Americans variously perceive as broken frustrating and unresponsive Editor James Perry observes in his Introduction that this perception is rooted in three simultaneous developments government's failure to perform basic tasks that once were taken for granted an accelerating pace of change that quickly makes past standards of performance antiquated and a dearth of intellectual capital that generate the capacity to bridge the gulf between expectations and performance The second idea hearkens back to the Progressive era when Americans revealed themselves to be committed to better administration of their government at all levels federal state and local These two ideas the diminishing capacity for effective governance and Americans expectations for reform are veering in opposite directions Contributors to *Public Service and Good Governance for the Twenty First Century* explore these central ideas by addressing such questions as what is the state of government today Can future disruptions of governance and public service be anticipated What forms of government will emerge from the past and what institutions and structures will be needed to meet future challenges And lastly and perhaps most importantly what knowledge skills and abilities will need to be fostered for tomorrow's civil servants to lead and execute effectively *Public Service and Good Governance for the Twenty First Century* offers recommendations for bending the trajectories of governance capacity and reform expectations toward convergence including reversing the trend of administrative disinvestment developing talent for public leadership through higher education creating a federal civil service to meet future needs and rebuilding bipartisanship so that the sweeping changes needed to restore good government become possible Contributors Sheila Bair William W Bradley John J DiIulio Jr Angela Evans Francis Fukuyama Donald F Kettl Ramayya Krishnan Paul C Light Shelley Metzenbaum Norman J Ornstein James L Perry Norma M Riccucci Paul R Verkuil Paul A Volcker

**Augmented Reality** Mark Pesce,2020-10-22 Slated as the next big thing in tech augmented reality promises to take the  
screen out of our hands and wrap it around the world via smart spectacles As a pervasive invisible interface between the  
world and our senses AR offers unparalleled capacity to reveal hidden digital depths but it also comes at a cost to our privacy  
our property and our reality In this crucial and provocative book Mark Pesce draws on over thirty years experience to offer  
the first mainstream exploration of augmented reality He discusses the exciting and beneficial features of AR as well as the  
issues and risks raised by this still emerging technology a technology that moulds us by shaping what we see and hear  
Augmented Reality is essential reading for anyone interested in the growing influence of this impressive but deeply  
concerning technology As the book reveals reality once augmented will never be the same      *The Robots Are Coming!*

Andres Oppenheimer,2019-04-30 Staying true to his trademark journalistic approach Andr s Oppenheimer takes his readers  
on yet another journey this time across the globe in a thought provoking search to understand what the future holds for  
today s jobs in the foreseeable age of automation The Robots Are Coming centers around the issue of jobs and their future in  
the context of rapid automation and the growth of online products and services As two of Oppenheimer s interviewees both  
experts in technology and economics from Oxford University indicate forty seven percent of existing jobs are at risk of  
becoming automated or rendered obsolete by other technological changes in the next twenty years Oppenheimer examines  
current changes in several fields including the food business legal work banking and medicine speaking with experts in the  
field and citing articles and literature on automation in various areas of the workforce He contrasts the perspectives of  
techno optimists with those of techno negativists and generally attempts to find a middle ground between an alarmist vision  
of the future and one that is too uncritical A self described cautious optimist Oppenheimer believes that technology will not  
create massive unemployment but rather will drastically change what work looks like      **Ethics and Business** Paul C.
