Stewart,2011-10-11 In seeking to evaluate the efficacy of post 9 11 homeland security expenses which have risen by more than a trillion dollars not including war costs the common query has been Are we safer This however is the wrong question Of course we are safer the posting of a single security guard at one building s

entrance enhances safety The correct question is Are any gains in security worth the funds expended In this engaging readable book John Mueller and Mark Stewart apply risk and cost benefit evaluation techniques to answer this very question This analytical approach has been used throughout the world for decades by regulators academics and businesses but as a recent National Academy of Science study suggests it has never been capably applied by the people administering homeland security funds Given the limited risk terrorism presents expenses meant to lower it have for the most part simply not been worth it For example to be considered cost effective increased American homeland security expenditures would have had each year to have foiled up to 1 667 attacks roughly like the one intended on Times Square in 2010 more than four a day Cataloging the mistakes that the US has made and continues to make in managing homeland security programs Terror Security and Money has the potential to redirect our efforts toward a more productive and far more cost effective course
