Bravo! Your Preface statement GenAI has created an ultra-high-level programming capability that will leverage your Java learning experience and ability to produce robust top-quality Java software quickly, conveniently, and economically is a great conclusion to the Preface intro. It really helps justify the use of GenAI. Brian Canada, Professor of Computational Science, University of South Carolina Beaufort. After reading your whole book, it was fun to read the Preface that wraps everything up at a high level. You have done some amazing work here, and I'm glad to have been a small part of it as a reviewer. I especially appreciate how difficult it must have been to make sure everything was as up-to-date as possible with the speed at which things change in this field and the deftness with which you incorporated all the focus on GenAI and data science that's in this book. Emily Navarro, Ph.D., Continuing Lecturer, Department of Informatics, University of California, Irvine. The generative AI exercises are awesome and reflect the way modern developers work. They are fun and let the reader explore and learn about AI by using AI. How meta! This allows readers to expand their knowledge and get a feel for the AI's code-related capabilities.
