The 21st Century Brain Richard Restak, 2025-11-18 Discover the Influences of Social Media Artificial Intelligence AI Climate Change Stress and More on Our Brains and Behavior Unique to the Twenty first Century During the past twenty five years we ve encountered powerful influences for good and bad on brain function and even brain structure Consider the changes that have already taken place in how we communicate During the last half of the twentieth century images displaced words as the common parlance of communication On the nightly news we ve become accustomed to watching images drawn from video cameras used by law enforcement and thanks to a proliferating number of cellphones everyday use Yet AI is turning the traditional dynamic that images carry more weight than words seeing is believing upside down because we now have to question the authenticity of images We are finding ourselves forced to adjust to a world where what we see is not always what s really happening Next consider the effects of our changing environment on our brains and our behavior There is good reason to believe that a link exists between an increase in global temperature and suicide Wildfires becoming more and more common thanks to climate change affect air quality which is often undetectable by the average person until it reaches toxic levels Studies have proven that wildfire smoke is affecting our brains and potentially causing disease Perhaps the greatest twenty first century contributor to changes in brain function is stress Due to many factors explored in the book it s likely that levels of mental and emotional instability are on the horizon that can only be fully understood by focusing on the changes in the human brain brought about by these unparalleled levels of stress The brain is always evolving The 21st Century Brain will describe those influences on brain and behavior that are unique to this century as well as available preventive measures to mitigate some of these factors This book is a quintessential study on how our brains are uniquely changing in the twenty first century as well as a guide to the personal and collective measures that can be taken to eliminate these factors or reduce their impact

Survey of US Higher Education Faculty 2023, Views on

and Use of ChatGPT Primary Research Group Inc.,2023-03-15 This study looks at how faculty of US colleges and universities are experiencing the use of the artificial intelligence program ChatGPT by students and by themselves in their classes The study also examines how college administration academic departments and individual professors and other instructors are developing guidelines for ChatGPT use The report helps its readers to answer questions such as to what extent to college faculty feel that ChatGPT undermines traditional approaches to college term papers How serious a problem is ChatGPT inspired plagiarism and other unattributed uses of ChatGPT To what degree and how do college faculty feel that ChatGPT should be integrated into traditional paper writing and other college course requirements Just a few of this report's many findings are that 13 62% of faculty surveyed felt that their college administration had developed general guidelines on student and faculty use of ChatGPT in their classes Faculty at community colleges were more likely than those of faculty at other institutions to feel that unattributed use of ChatGPT by students was a significant problem Faculty at private colleges were in general more highly satisfied than faculty at public colleges with the institutional response to challenges of ChatGPT This 115 page study is based on data from a survey of 954 higher education faculty randomly chosen from nearly 500 colleges and universities in the USA Data is broken out by personal variables such as work title gender personal income level academic discipline age and other variables as well as institutional indicators such as college or university type or Carnegie class enrollment size public or private status and others
