FCC Record United States. Federal Communications Commission, 2013. [Television Show Trends, 2016-2020](#) Yvonne D. Leach, Nicholas J. Natalicchio, 2023-11-20. What do *Euphoria*, *Normal People*, *Atlanta*, *Ramy*, *Vida*, *I May Destroy You*, *Stranger Things*, and *Lovecraft Country* have in common? In the 2016-2020 time period, they were created. These TV shows exemplified one or more of four noteworthy trends: authenticity, diversity, sexual candor, and retrospection. This is the first book to examine live-action fictional television shows produced within a five-year period through the lens of the trends that they epitomize. For each show, the following is discussed: the significance of the platform and the format, the intentions of the creators and showrunners, pertinent background information, similar shows and precedents, the storytelling approach, the cinematic form, and finally, how the show is emblematic of that particular trend. Since trends have the possibility of becoming part of the mainstream, they are important to identify as they emerge, especially for viewers who have a keen interest in narrative television shows.

Broadcasting & Cable, 2007-11 **Aaron Swartz's The Programmable Web** Aaron Swartz, 2022-11-10 This short work is the first draft of a book manuscript by Aaron Swartz written for the series Synthesis Lectures on the Semantic Web at the invitation of its editor James Hendler Unfortunately the book wasn't completed before Aaron's death in January 2013 As a tribute the editor and publisher are publishing the work digitally without cost From the author's introduction we will begin by trying to understand the architecture of the Web what it got right and occasionally what it got wrong but most importantly why it is the way it is We will learn how it allows both users and search engines to co-exist peacefully while supporting everything from photo sharing to financial transactions We will continue by considering what it means to build a program on top of the Web how to write software that both fairly serves its immediate users as well as the developers who want to build on top of it Too often an API is bolted on top of an existing application as an afterthought or a completely separate piece But as we'll see when a web application is designed properly APIs naturally grow out of it and require little effort to maintain Then we'll look into what it means for your application to be not just another tool for people and software to use but part of the ecology a section of the programmable web This means exposing your data to be queried and copied and integrated even without explicit permission into the larger software ecosystem while protecting users' freedom Finally we'll close with a discussion of that much maligned phrase the Semantic Web and try to understand what it would really mean
