New Policies for Mandatory Defined Contribution Pensions Gregorio Impavido,Esperanza Lasagabaster,Manuel Garc a-Huitr n,2010-06-04 Mandatory defined contribution pension markets are present in a growing number of countries around the world But despite their popularity policymakers continue to struggle with two key policy concerns On the one hand a number

of design shortcomings encourages pension firms to charge high administrative fees On the other hand the global crisis that started in 2007 has reignited the debate on whether pension participants bear excessive investment risk Both are valid policy concerns as their incidence can imply higher than expected levels of poverty among old age individuals Both concerns have the same root problem the limited capacity of individuals to choose what is best for them This in turn stems from a combination of inadequate financial education bounded rationality and the use of simplistic rules of thumb that produce systematic biases in the decision making process of individuals While improving financial education is an obvious avenue to pursue this book is more concerned with design features that can exploit these systematic biases to protect consumers from themselves New Policies for Mandatory Defined Contribution Pensions Industrial Organization Models and Investment Products i discusses the main implications for the functioning of mandatory defined contribution pensions of consumers inability to make rational choices ii describes how jurisdictions have tried to address these problems through ad hoc policy interventions and iii proposes new policy directions in the areas of industrial organization models and investment products to address these concerns more effectively Written for practitioners and researchers around the world this book provides access to new thinking on mandatory defined contribution pension systems and it makes an important contribution to the on going policy debate on how to best structure mandatory defined contribution pillars
