People And Place The Extraordinary Geographies Of Everyday Life:

People and Place Lewis Holloway, Phil Hubbard, 2014-01-14 An innovative introduction to Human Geography exploring different ways of studying the relationships between people and place and putting people at the centre of human geography. The book covers behavioural, humanistic and cultural traditions showing how these can lead to a nuanced understanding of how we relate to our surroundings on a day to day basis. The authors also explore how human geography is currently influenced by postmodern ideas stressing difference and diversity. While taking the importance of these different approaches seriously as ways of thinking about the role of place in people's everyday lives, the book also tries to encapsulate what has been so vibrant and exciting about human geography over the last couple of decades. By using examples to which students can relate such as how they imagine and represent their home, the way they avoid certain spaces, how they move through retail spaces where they choose to go to university, how they use the Internet, how they represent other nations and so on, the authors show how geography shapes everyday life in a manner that is seemingly mundane yet profoundly important. **The**

Routledge Handbook of Place Tim Edensor, Ares Kalandides, Uma Kothari, 2020-05-26 The handbook presents a compendium of the diverse and growing approaches to place from leading authors as well as less widely known scholars providing a comprehensive yet cutting edge overview of theories, concepts and creative engagements with place that resonate with contemporary concerns and debates. The volume moves away from purely western based conceptions and discussions about place to include perspectives from across the world. It includes an introductory chapter which outlines key definitions, draws out influential historical and contemporary approaches to the theorisation of place and sketches out the structure of the book explaining the logic of the seven clearly themed sections. Each section begins with a short introductory essay that provides identifying key ideas and contextualises the essays that follow. The original and distinctive contributions from both new and leading authorities from across the discipline provide a wide, rich and comprehensive collection that chimes with current critical thinking in geography. The book captures the dynamism and multiplicity of current geographical thinking about place by including both state of the art in depth critical overviews of theoretical approaches to place and new explorations and cases that chart a framework for future research. It charts the multiple ways in which place might be conceived, situated and practised. This unique comprehensive and rich collection will be an essential resource for undergraduate and graduate teaching for experienced academics across a wide range of disciplines and for policymakers and place marketers. It will provide an invaluable and up to date guide to current thinking across the range of disciplines such as Geography, Sociology and Politics and interdisciplinary fields such as Urban Studies, Environmental Studies and Planning.
