Perilous Enlightenment:

Perilous Enlightenment George Sebastian Rousseau, 1991 *Framing and Imagining Disease in Cultural History* G. Rousseau, M. Gill, D. Haycock, M. Herwig, 2003-07-03 Throughout human history illness has been socially interpreted before its range of meanings could be understood and disseminated Writers of diverse types have been as active in constructing these meanings as doctors yet it is only recently that literary traditions have been recognized as a rich archive for these interpretations These essays focus on the methodological hurdles encountered in retrieving these interpretations called framing by the authors *Framing and Imagining Disease in Cultural History* aims to explain what has been said about these interpretations and to compare their value *Children and Sexuality* G. Rousseau, 2007-12-14 *Children and Sexuality* probes the hidden relations between children and sexuality in case studies from the Greeks to the Great War The lives reconstructed here extend from Greek Alcibiades to Lewis Carroll and Baden Powell each recounted with scrupulous vigilance to detail and nuance **The Wilde Century** Alan Sinfield, 1994 Explores how the characters in Oscar Wilde's plays though not specifically gay epitomize today's image of the effeminate male how they relate to British theatrical fops and other characters since early modern times how the representation of same sex passion was altered by Wilde's expose and trial as a homosexual and how the stereotype of the gay man became established in the 20th century Annotation copyright by Book News Inc Portland OR **Reader's Guide to the History of Science** Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn **Nervous Acts** G. Rousseau, 2004-11-02 These essays demonstrate the sweeping influence of the human nervous system on the rise of literature and sensibility in early modern Europe The brain and nerves have usually been treated as narrow topics within the history of science and medicine Now George Rousseau an international authority on the relations of literature and medicine demonstrates why a broader context is necessary The nervous system was a crucial factor in the rise of recent civilization More than any other body part it holds the key to understanding how far back the strains and stresses of modern life fatigue depression mental illness extend **The Stoic Philosophy** Gilbert Murray, 1915 *Liberating Medicine, 1720-1835* Tristanne Connolly, Steve Clark, 2015-10-06 During the 18th century medicine became an autonomous discipline and practice Surgeons justified themselves as skilled practitioners and set themselves apart from the unspecialized hack barber surgeons of early modernity This title presents 17 essays on the relationship between medicine and literature during the Enlightenment **The Cambridge History of Science: Volume 4, Eighteenth-Century Science** David C. Lindberg, Roy Porter, Ronald L. Numbers, 2003-03-17 The fullest and most complete survey of the development of science in the eighteenth century **Thomas Gray among the Disciplines** Ruth

Abbott, Ephraim Levinson, 2024-12-31 Throughout the 250 years that have passed since Thomas Gray's death he has primarily been celebrated as a poet. This makes sense because although he published relatively little verse he published less indeed precisely nothing of his abundant polymathic writing in other fields. His place within the history of scholarship has therefore been obscured. Like many eighteenth-century antiquaries however he shared his learning through correspondence and manuscript circulation and thereby influenced intellectual as well as literary life. This book explores Gray's scholarship within the changing norms of eighteenth-century disciplines at once locating him within histories of specialisation and examining the ways in which he challenges their narratives. Scholars from across the humanities reveal his methods and global interests and analyse many newly uncovered manuscripts. Offering fresh understanding of broader fields through focused investigation of Gray's multidisciplinary writings the book will appeal to scholars of eighteenth-century literary, intellectual and scientific history.

University of Toronto Quarterly University of Toronto, 1992 **Studies in Eighteenth-century Culture** Timothy

Erwin, Julie Candler Hayes, 1998 This volume presents a group of essays that evoke broad contexts and future avenues for work in the field of 18th-century studies. The contributors take up the question of identity not as a fixed stable property whose boundaries may be confidently mapped but rather as a complex and unpredictable process navigating different discourses and modes of social insertion. They address issues that involve national, linguistic and cultural affiliations or call into question the relation of gender performance to literary persona.
