web the function defined by $f(x) = b^x$ for $b > 0$, $b \neq 1$ is called an exponential function with base b and exponent x here the domain of f can be explained as a set of all real numbers let m and n be positive numbers and let a and b be real numbers then the exponential function $y = b^x$ for $b > 0$, $b \neq 1$ is associated with the following properties the domain is

exponential and logarithmic functions toppr - Apr 19 2022

web the exponential and the logarithmic functions are perhaps the most important functions you ll encounter whenever dealing with a physical problem they are the inverse of each other and can be used to represent a large range of numbers very conveniently

3 2 1 solving exponential equations k12 libretexts - Sep 24 2022

web mar 27 2022 a common technique for solving equations with unknown variables in exponents is to take the log of the desired base of both sides of the equation then you can use properties of logs to simplify and solve the equation take the following equation to solve for t you should first simplify the expression as much as possible and then take
