Temples and Sanctuaries in the Roman East Arthur Segal,2013-10-31 This lavishly illustrated volume presents a comprehensive architectural study of 87 individual temples and sanctuaries built in the Roman East between the end of the 1st century BCE and the end of the 3rd century CE within a broad region encompassing the modern states of Syria Lebanon Israel and Jordan Religious architecture gave faithful expression to the complexity of the Roman East and to its multiplicity of traditions pertaining to ethnic and religious aspects as well as to the powerful influence of Imperial Rome The source of this power lay in the uniformity of the architectural language the inventory of forms the choice of styles and the spatial layout of

the buildings Thus while temples have an eclectic character there is an underlying unity of form comprising the podium the stairway between the terminating walls antae and the columns along the entrance front in other words the axuality frontality and symmetry of the temple as viewed from outside The temples and sanctuaries studied in this volume demonstrate individual nuances of plan spatial design location in the sanctuary and interrelations with the immediate vicinity but can be divided into two main categories Vitruvian temples derived from Hellenistic Roman architecture and Non Vitruvian temples those with plans and spatial designs that cannot be analysed according to architectural criteria such as those defined by Vitruvius The individual descriptions presented focus solely upon the analysis of the external and internal space of the temples of all types and do not involve any cultural or ethnic discussion

Pergamon and Rome: Culture, Identity, and Influence ,2025-06-19 This interdisciplinary volume provides the first comprehensive study of Rome s relationship with the kingdom and city of Pergamon It surveys the rich and diverse interactions between these two cities from the late third century BCE to the fourth century CE ranging across multiple cultural spheres including art and architecture history and politics literature and poetry philosophy and thought scholarship and rhetoric The book reassesses the nature scope and extent of Pergamon and Rome s so called special relationship shedding light on much discussed problems offering new evidence for their cultural interactions and questioning long established assumptions One recurrent theme concerns the limitations of our knowledge extant evidence is limited and often skewed by later Roman sources and it is frequently very difficult to identify and define cultural features that are distinctively Pergamene Nevertheless there was certainly an important relationship between these two cities which this volume seeks to map out with greater nuance precision and breadth setting it within a wider interconnected Hellenistic context As a whole the volume reflects on the scholarly reception of Pergamon uncovering how and when a certain view of a cohesive Pergamene culture took shape among modern scholarship and what factors prejudices and assumptions undergirded its creation It also challenges and rethinks the frameworks that shape our view of cultural activity in the Hellenistic world emphasizing the porousness of cultural movements across political boundaries This book will be of interest not only to scholars of Roman culture but also to those interested in the impact of Hellenistic culture on Rome more generally and to scholars engaged with theories and models of cultural influence

Hellenistic Architectural Sculpture Pamela A. Webb,1996 Sculpted figural motifs were an important component of many buildings in the Hellenistic world and their frequent relegation to subsidiary status has until now left our knowledge of both Hellenistic architecture and sculpture incomplete In *Hellenistic Architectural Sculpture* Pamela A Webb examines the full range of figural embellishment from simple to complex on large monuments as well as on more obscure ones and in the major population centers as well as the smaller cities sanctuaries and isolated areas throughout western Anatolia and the Aegean islands In this book the first to focus specifically on the figural adornment of Hellenistic architecture Webb provides extensive information about the chronology and interpretation of figural motifs adorning religious civic

commercial commemorative and domestic constructions She finds that figural sculptures adorn structures at every level from the ground to the roof and display a wide variety of motifs on such architectural elements as columns walls entablatures and pediments More than 130 illustrations of Hellenistic monuments temples altars cult buildings heroa theaters bouleuteria stoas gymnasia and houses and their sculptured adornment complement the author s descriptions and analyses The book features an extensive bibliography citing resources from the early nineteenth century to the most recent publications

Ancient Mythological Images and

their Interpretation Katharina Lorenz, 2016-08-18 When we try to make sense of pictures what do we gain when we use a particular method and what might we be missing or even losing Empirical experimentation on three types of mythological imagery a Classical Greek pot a frieze from Hellenistic Pergamon and a second century CE Roman sarcophagus enables Katharina Lorenz to demonstrate how theoretical approaches to images specifically iconology semiotics and image studies impact the meanings we elicit from Greek and Roman art A guide to Classical images of myth and also a critical history of Classical archaeology's attempts to give meaning to pictures this book establishes a dialogue with the wider field of art history and proposes a new framework for the study of ancient visual culture It will be essential reading not just for students of classical art history and archaeology but for anyone interested in the possibilities and the history of studying visual culture
