**The Book of Revelation and the Visual Culture of Asia Minor** Andrew R. Guffey, 2019-10-10 The images in the book of Revelation confound even the most seasoned of interpreters In this book Andrew R. Guffey argues that part of the confusion stems from the fact that the book of Revelation was first and foremost a work to be seen but that few interpreters address the visuality of the book *The Book of Revelation and the Visual Culture of Asia Minor* describes a connection between rhetorical discussions of ekphrasis visual culture and John's images a concurrence of images using theory and thick historical description Guffey's analysis situates the text and its rhetorical performativity in the context of ancient visual and rhetorical culture arguing that Revelation is not merely a work of literary craft but also of visual culture

Prayers in Stone Brunilde S. Ridgway, 1999-08-31 The meaning of architectural sculpture is essential to our understanding of ancient Greek culture The embellishment of buildings was common for the ancient Greeks and often provocative Some ornamental sculpture was placed where when the building was finished no mortal eye could view it And unlike much architectural ornamentation of other cultures Greek sculpture was often integral to the building not just as decoration and could not be removed without affecting the integrity of the building structure This book is the first comprehensive treatment of the significance of Greek architectural sculpture Brunilde Sismondo Ridgway a world class authority on ancient Greek sculpture provides a highly informative tour of many dimensions of Greek public buildings especially temples tombs and treasuries in a text that is at once lucid accessible and authoritative Ridgway's pragmatism and common sense steer us tactfully and clearly through thickets of uncertainty and scholarly disagreement She refers to a huge number of monuments and documents her discussions with copious and up to date bibliographies This book is sure to be acknowledged at once as the standard treatment of its important topic

age from the death of Alexander the Great in 323 B C to the Romans defeat of Cleopatra in 30 B C Graham Zanker makes enlightening discoveries about the assumptions and conventions of Hellenistic poets and artists and their audiences Zanker s exciting new interpretations closely compare poetry and art for the light each sheds on the other He finds for example an exuberant expansion of subject matter in the Hellenistic periods in both literature and art as styles and iconographic traditions reserved for grander concepts in earlier eras were applied to themes motifs and subjects that were emphatically less grand

**Couched in Death** Elizabeth P. Baughan,2013 In Couched in Death Elizabeth P Baughan offers the first comprehensive look at the earliest funeral couches in the ancient Mediterranean world These sixth and fifth century BCE klinai from Asia Minor were inspired by specialty luxury furnishings developed in Archaic Greece for reclining at elite symposia It was in Anatolia however in the dynastic cultures of Lydia and Phrygia and their neighbors that klinai first gained prominence not as banquet furniture but as burial receptacles For tombs wooden couches were replaced by more permanent media cut from bedrock carved from marble or limestone or even cast in bronze The rich archaeological findings of funerary klinai throughout Asia Minor raise intriguing questions about the social and symbolic meanings of this burial furniture Why did Anatolian elites want to bury their dead on replicas of Greek furniture Do the klinai found in Anatolian tombs represent Persian influence after the conquest of Anatolia as previous scholarship has suggested Bringing a diverse body of understudied and unpublished material together for the first time Baughan investigates the origins and cultural significance of kline burial and charts the stylistic development and distribution of funerary klinai throughout Anatolia She contends that funeral couch burials and banqueter representations in funerary art helped construct hybridized Anatolian Persian identities in Achaemenid Anatolia and she reassesses the origins of the custom of the reclining banquet itself a defining feature of

ancient Mediterranean civilizations Baughan explores the relationships of Anatolian funeral couches with similar traditions in Etruria and Macedonia as well as their afterlife in the modern era and her study also includes a comprehensive survey of evidence for ancient klinai in general based on analysis of more than three hundred klinai representations on Greek vases as well as archaeological and textual sources *Art, Science, and the Natural World in the Ancient Mediterranean, 300 BC to AD 100* Joshua J. Thomas, 2021-12-22 The Hellenistic Period witnessed striking new developments in art literature and science This volume addresses a particularly vibrant area of innovation the study of animals and the natural world While Aristotle and his followers had revolutionized fields such as zoology and botany during the fourth century BC these disciplines took on exciting new directions during Hellenistic times Kings imported exotic species into their royal capitals from faraway lands Travel writers described unusual creatures that they had never previously encountered And buyers from a range of social levels chose works of art featuring animals and plants to decorate their palaces houses and tombs While textual sources shed some light on these developments the central premise of *Art Science and the Natural World in the Ancient Mediterranean* is that our surviving artistic evidence permits a fuller understanding Accordingly the study brings together a rich body of visual material that invites new observations on how and why knowledge of the natural world became so important during this period It is suggested that this cultural phenomenon affected many different groups in society from kings in Alexandria and Pergamon to provincial aristocrats in the Levant and from the Julio Claudian imperial family to prosperous homeowners in Pompeii By analysing the works of art produced for these individuals a vivid picture emerges of this remarkable aspect of ancient culture *The Temple of Athena at Assos* Bonna D. VII the famous Cleopatra in 30 B C is one of the most complex and exciting epochs of ancient Greek art The unprecedented geographic sweep of Alexander s conquests changed the face of the ancient world forever forging diverse cultural connections and exposing Greek artists to a host of new influences and artistic styles This beautifully illustrated volume examines the rich diversity of art forms that arose through the patronage of the royal courts of the Hellenistic kingdoms placing special emphasis on Pergamon capital of the Attalid dynasty which ruled over large parts of Asia Minor With its long history of German led excavations Pergamon provides a superb paradigm of a Hellenistic capital appointed with important civic institutions a great library theater gymnasium temples and healing center that we recognize today as central features of modern urban life The military triumphs of Alexander and his successors led to the expansion of Greek culture out from the traditional Greek heartland to the Indus River Valley in the east and as far west as the Strait of Gibraltar These newly established Hellenistic kingdoms concentrated wealth and power resulting in an unparalleled burst of creativity in all the arts from architecture and sculpture to seal engraving and glass production Pergamon and the Hellenistic Kingdoms of the Ancient World brings together the insights of a team of internationally renowned scholars who reveal how the art of Classical Greece was transformed during this period melding with predominantly Eastern cultural traditions to yield new standards and conventions in taste and style
