Partial Identification in Econometrics and Related Topics Nguyen Ngoc Thach, Nguyen Duc Trung, Doan Thanh Ha, Vladik Kreinovich, 2024-07-31 This book covers data processing techniques with economic and financial application being the unifying theme To make proper investments in economy the authors need to have a good understanding of the future trends how will demand change how will prices change etc In general in science the usual way to make predictions is to identify a model that best fits the current dynamics and to use this model to predict the future behavior In many practical situations especially in economics our past experiences are limited As a result the authors can only achieve a partial identification It is therefore important to be able to make predictions based on such partially identified models which is the main focus of this book This book emphasizes partial identification techniques but it also describes and uses other econometric techniques ranging from more traditional

statistical techniques to more innovative ones such as game theoretic approach interval techniques and machine learning Applications range from general analysis of GDP growth stock market and consumer prices to analysis of specific sectors of economics credit and banking energy health labor tourism international trade to specific issues affecting economy such as ecology national culture government regulations and the existence of shadow economy This book shows what has been achieved but even more important are remaining open problems The authors hope that this book will inspire practitioners to learn how to apply state of the art techniques especially techniques of optimal transport statistics to economic and financial problems and inspire researchers to further improve the existing techniques and to come up with new techniques for studying economic and financial phenomena The authors want to thank all the authors for their contributions and all anonymous referees for their thorough analysis and helpful comments The publication of this book and organization of the conference at which these papers were presented was supported by the Ho Chi Minh University of Banking HUB Vietnam and by the Vingroup Innovation Foundation VINIF The authors thank the leadership and staff of HUB and VINIF for providing crucial support

banks corporations and the healthcare system are willing to do what the deep state can't. Now that they're out of power in the White House and Congress the Democrats are mobilizing in the shadows working to make sure an election like 2024 never happens again. In 'They're Coming for You' Jason Chaffetz reveals how Democrats have been planting the seeds of political control using unelected institutions that collect and weaponize private information. Most of us know we have traded our privacy for convenience. Most of us have chosen not to worry that the government will track our Facebook posts and arrest us. But what if an online retailer does? What if companies use that data to refuse to hire us, do business with us or ship products to us? 'They're Coming for You' lays bare the frightening truth about how these institutions are collecting, buying, selling and sharing our data without regard for our privacy, civil liberties or national security. Republican political victories will ring hollow until this bureaucratic partnership with the nonprofit and private sectors is exposed and the power of the administrative state checked.
