Online Misogyny as Hate Crime Kim Barker,Olga Jurasz,2018-12-07 The ideal of an inclusive and participatory Internet has been undermined by the rise of misogynistic abuse on social media platforms However limited progress has been made at national and to an extent European levels in addressing this issue In England and Wales the tackling of underlying causes of online abuse has been overlooked because the law focuses on punishment rather than measures to prevent such abuses Furthermore online abuse has a significant impact on its victims that is underestimated by policymakers This volume critically analyses the legal provisions

that are currently deployed to tackle forms of online misogyny and focuses on three aspects firstly the phenomenon of social media abuse secondly the poor and disparate legal responses to social media abuses and thirdly the similar failings of hate crime to tackle problems of online gender based abuses This book advances a compelling argument for legal changes to the existing hate crime and communications legislation **What Matters for Health and Happiness Among the Older**

Adults in Asia Nai Peng Tey, Halimah Awang, Shekhar Chauhan, 2024-03-11 People want to live a healthy and happy later life A large body of literature shows the close association between health status and happiness and between health and active engagement in work exercise and social and religious activities However the causation between the two can run both ways and it is difficult to determine the causal effect with cross sectional data Various authors have shown the significant influence of socioeconomic factors and human needs on older people s health status and happiness A better understanding of the factors affecting healthy and happy aging is essential for policymaking to improve the well being of older people The availability of data from HRS family studies in several Asian countries CHARLS in China LASI in India JSTAR in Japan KLoSA in Korea IFLS in Indonesia HART in Thailand MARS in Malaysia and Longitudinal Study of Ageing and Health in Viet Nam see Gateway to Global Aging Data provides an excellent opportunity for researchers to examine factors affecting health and happiness among older adults within and across Asian countries This research topic aims to gather papers that investigate the socioeconomic attitudinal and behavioural factors affecting the health status and happiness life satisfaction of older adults in Asia The dependent variables may include physical health mental health disability ADL IADL cognitive functioning self rated health health expenditure feeling of happiness and life satisfaction The independent variables may be age gender marital status place of residence educational level active engagement work exercise social and religious activities family and social relationship and support outlook in life smoking drinking and access to and utilization of healthcare services etc Manuscripts can be based on individual countries or cross country analysis preferably using the panel data to establish the causal effects of the independent variables on the dependent variables **Professional Builder** ,2008 **EXPL**
