Drinking from the Fire Hose Christopher J Frank, Paul Magnone, 2011-09-01 You're sitting in a windowless conference room Twenty minutes into the meeting the presenter finally makes it to slide four of a thirty two slide deck At least you can read this one unlike the others which were crammed with numbers graphs and charts You look around wondering if anyone else is following the presentation Just about everyone these days suffers from information overload the 24/7 explosion from our computers smartphones media colleagues and customers Information is essential to making intelligent decisions but more often than not it simply overwhelms us It's like trying to drink from a fire hose The question isn't how to stop all those e-mails meetings conference calls and fat reports that's impossible The question is what to do with them How do you find the truly essential nuggets of information and use them with confidence The solution proposed by Christopher Frank and Paul Magnone sounds deceptively simple Learn how to ask the right questions at the right time Whatever field you're in asking smarter questions will expose you to new information point you to connections between seemingly unrelated facts and open new avenues of discussion with your colleagues The authors explain the seven questions that can help you bring a big picture perspective to problems that often leave others buried in irrelevant details And they show through real life case studies including Trader Joe's Starbucks Kodak Microsoft iRobot and IBM how their method can have a dramatic impact It really is possible to convert the fire hose of information into useful insights Consider a nonbusiness example the 2010 Icelandic volcano eruption that sent a giant ash cloud toward Europe Tens of thousands of flights were canceled and five million passengers stranded leading to billions in economic losses Europe's best scientists generated oceans of data and carefully modeled the cloud's dispersion pattern But no one could answer the essential question Was the

concentration of volcanic ash in the air enough to damage a jet engine Without that key answer all the carefully gathered facts were useless to the decision makers Once you adopt the seven questions you ll start having more productive brainstorming sessions You ll answer critical questions faster and find unexpected solutions to important problems And you ll get better at communicating to your colleagues with more clarity and focus turning down the fire hose that other people have to cope with

My Theory of Evolution Will Coakley,2025-03-07 My book is about my family and how interesting our lives have been I love my family and wanted to include it in my book I also talked about money how important money is and why we all need money I talked about how I am going to be a billionaire one day and I am on the right path I talked about a few news stories including some rescue stories and unfortunate losses I also talked about sports including George Mason s Final Four run When I talked about music I talked about how it relates to me and how I love to sing to the good songs and not the bad songs I did talk about God and believers and nonbelievers and at one point I did say to go to the side that believes in this world I also talked about tests that are given to us and that we need to pass these tests given to us by the specific groups

The Price of Prosperity Todd G. Buchholz,2016-06-07 In this bold history and manifesto a former White House director of economic policy exposes the economic political and cultural cracks that wealthy nations face and makes the case for transforming those same vulnerabilities into sources of strength and the foundation of a national renewal America and other developed countries including Germany Japan France and Great Britain are in desperate straits The loss of community a contracting jobs market immigration fears rising globalization and poisonous partisanship the adverse price of unprecedented prosperity are pushing these nations to the brink Acclaimed author economist hedge fund manager and presidential advisor Todd G Buchholz argues that without a sense of common purpose and shared identity nations can collapse The signs are everywhere Reckless financial markets encourage people to gamble with other people s money A coddling educational culture removes the stigma of underachievement Community traditions such as American Legion cookouts and patriotic parades are derided as corny or jingoistic Newcomers are watched with suspicion and contempt As Buchholz makes clear the United States is not the first country to suffer these fissures In The Price of Prosperity he examines the fates of previous empires those that have fallen as well as those extricated from near collapse and the ruins of war thanks to the vision and efforts of strong leaders He then identifies what great leaders do to fend off the forces that tear nations apart Is the loss of empire inevitable No Can a community spirit be restored in the U S and in Europe The answer is a resounding yes We cannot retrieve the jobs of our grandparents but we can embrace uniquely American traditions while building new foundations for growth and change Buchholz offers a roadmap to recovery and calls for a revival of national pride and patriotism to help us come together once again to protect the nation and ensure our future
