

ACT Science Passage Practice

Title: The Use of Cells and Regeneration
Introduction

Stem cells, a unique type of cell with the remarkable ability to develop into various cell types, have gained significant attention in the field of regenerative medicine. These cells hold the potential to revolutionize medical treatments by offering solutions to a range of diseases and injuries. Two researchers, Dr. Smith and Dr. Rodriguez, present their perspectives on the applications and potential of these cells in regenerative medicine.

Dr. Smith's View:

Dr. Smith believes that the key to unlocking the full potential of stem cells lies in harnessing their capacity to self-renew. Pluripotent stem cells have the ability to differentiate into any cell type in the human body, making them invaluable for regaining damaged tissues and organs. Dr. Smith emphasizes the importance of understanding the mechanisms of stem cell self-renewal, as they are essential for their pluripotency. He argues that the use of stem cells in regenerative medicine has the potential to revolutionize the treatment of various diseases, from heart disease to neurological disorders. Dr. Smith suggests exploring methods to enhance the differentiation process, allowing stem cells to develop into specific tissues that can replace damaged or lost cells.

Dr. Rodriguez's View:

Dr. Rodriguez, on the other hand, is focused on the ethical implications of using stem cells. He argues that while the potential of stem cells is vast, the use of embryonic stem cells raises significant ethical concerns. He believes that the creation and use of embryos for research and medical purposes is morally unacceptable. Dr. Rodriguez highlights the importance of ensuring that any use of stem cells in regenerative medicine adheres to strict ethical guidelines. He calls for a balanced approach that respects human life while pursuing scientific advancement. Dr. Rodriguez believes that focusing on adult stem cells and induced pluripotent stem cells (iPSCs) can provide a more ethically sound path forward. He suggests exploring ways to enhance the differentiation of these cells into specific tissues, which could avoid the ethical issues associated with embryonic stem cells.

Practice Questions

1. According to Dr. Smith, what is the key to unlocking the potential of stem cells in regenerative medicine?

- A. Harnessing self-renewal
- B. Differentiated cells
- C. Pluripotent stem cells
- D. Ability to create artificial cells

2. What is the primary advantage that Dr. Rodriguez sees in the use of pluripotent cells?

- A. Harnessing self-renewal
- B. Differentiated cells
- C. Pluripotent stem cells
- D. Ability to create artificial cells

3. In the context of the passage, what is the primary advantage of using pluripotent stem cells?

- A. The ability to self-renew
- B. The capacity to differentiate into any cell type
- C. The ability to create artificial cells
- D. The ability to replace damaged cells

4. Which statement presents the Dr. Smith and Dr. Rodriguez's view on the use of stem cells?

- A. Smith supports the use of embryonic stem cells
- B. Smith believes that artificial cells are the best way to create new tissues
- C. Smith believes that the potential of stem cells is vast
- D. Smith is concerned about the ethical implications of using stem cells

5. According to the passage, what advantage does Dr. Rodriguez see in using a particular type of stem cell for regenerative medicine?

- A. Harnessing self-renewal
- B. Differentiated cells
- C. Pluripotent stem cells
- D. Ability to create artificial cells
