How It Predicts Amazon Best Sellers? Akbas,2018-10-03 Abstract A book s success popularity depends on various parameters extrinsic and intrinsic In this paper we study how the book reading characteristics might influence the popularity of a book Towards this objective we perform a cross platform study of Goodreads entities and attempt to establish the connection between various Goodreads entities and the popular books Amazon best sellers We analyse the collective reading behaviour on Goodreads platform and quantify various characteristic features of the Goodreads entities to identify differences between these Amazon best sellers ABS and the other non best selling books We then develop a prediction model using the characteristic features to predict if a book shall become a best seller after one month 15 days since its publication On a balanced set we are able to achieve a very high average accuracy of 88 72% 85 66% for the prediction where the other competitive class contains books which are randomly selected from the Goodreads dataset Our method primarily based on features derived from user posts and genre related characteristic properties achieves an improvement of 16 4% over the traditional popularity factors ratings reviews based baseline methods We also evaluate our model with two more competitive set of books a that are both highly rated and have received a large number of reviews but are not best sellers HRHR and b Goodreads Choice Awards Nominated books which are non best sellers GCAN We are able to achieve quite good results with very high average accuracy of 87 1% and as well a high ROC for ABS vs GCAN For ABS vs HRHR our model yields a high average accuracy of 86 22%
