Modern Political Economics Making Sense Of The Post 2008 World:

Modern Political Economics Yanis Varoufakis, Joseph Halevi, Nicholas J. Theocarakis, 2012-03-29 Once in a while the world astonishes itself. Anxious incredulity replaces intellectual torpor and a puzzled public strains its antennae in every possible direction desperately seeking explanations for the causes and nature of what just hit it. 2008 was such a moment. Not only did the financial system collapse and send the real economy into a tailspin but it also revealed the great gulf separating economics from a very real capitalism. Modern Political Economics has a single aim. To help readers make sense of how 2008 came about and what the post 2008 world has in store. The book is divided into two parts. The first part delves into every major economic theory from Aristotle to the present with a determination to discover clues of what went wrong in 2008. The main finding is that all economic theory is inherently flawed. Any system of ideas whose purpose is to describe capitalism in mathematical or engineering terms leads to inevitable logical inconsistency, an inherent error that stands between us and a decent grasp of capitalist reality. The only scientific truth about capitalism is its radical indeterminacy, a condition which makes it impossible to use science's tools, e.g. calculus and statistics, to second-guess it. The second part casts an attentive eye on the post-war era, on the breeding ground of the Crash of 2008. It distinguishes between two major post-war phases: The Global Plan 1947-1971 and the Global Minotaur 1971-2008. This dynamic new book delves into every major economic theory and maps out meticulously the trajectory that global capitalism followed from post-war almost centrally planned stability to designed disintegration in the 1970s, to an intentional magnification of unsustainable imbalances in the 1980s, and finally to the most spectacular privatisation of money in the 1990s and beyond. Modern Political Economics is essential reading for Economics students and anyone seeking a better understanding of the 2008 economic crash.

Economics in the Twenty-First Century Robert Chernomas, Ian Hudson, 2016-06-16 Economics has always been nicknamed the dismal science, but today the field seems a little more dismal than usual as governments, social movements, and even students complain that the discipline is failing to make sense of the major economic problems of the day. In *Economics in the Twenty-First Century*, Robert Chernomas and Ian Hudson demonstrate how today's top young economists continue to lead the field in the wrong direction. The recent winners of the John Bates Clark medal, economics's baby Nobel, have won that award for studying important issues such as economic development, income inequality, crime, and health. Examining their research, Chernomas and Hudson show that this work focuses on individual choice, ignores the systematic role of power in the economic system, and leads to solutions that are of limited effectiveness at best and harmful at worst. An accessible summary of the latest debates in economics, *Economics in the Twenty-First Century* takes on what is missing from mainstream economics, why it matters, and how the discipline can better address the key concerns of our era.

The Political Economy of Inequality Frank Stilwell, 2019-05-10 During the last few decades, the gap between the incomes, wealth, and living standards of rich and poor people has increased in most countries. Economic inequality has become a defining issue of our age. In this book, leading

political economist Frank Stilwell provides a comprehensive overview of the nature causes and consequences of this growing divide He shows how we can understand inequalities of wealth and incomes globally and nationally examines the scale of the problem and explains how it affects our wellbeing He also shows that although governments are often committed to growth at all costs and trickle down economics there are alternative public policies that could be used to narrow the gap between rich and poor Stilwell s engaging and clear guide to the issues will be indispensable reading for all students general readers and scholars interested in inequality in political economy economics public policy and beyond

Political Economy for Human Rights Manuel Couret Branco,2019-06-05 Over time there has been a miscommunication between mainstream economics and human rights that has paved the way to a justificatory ideology that validates the submission of human rights to the logic of market capitalism This book shows how the discourse of mainstream economics is intrinsically opposed to the strengthening of human rights and outlines the principles upon which a human rights based political economy can be built Considering a variety of recognized human rights such as the right to water and sanitation the right to social security the right to work cultural freedom and democracy this book describes how mainstream economics theory conflicts with these rights and explores alternative modes of thinking that incorporate human rights concerns into economics Moreover the book also reflects on the teaching of political economy for human rights It sets out that a political economy favourable to human rights must be pluralist interdisciplinary participatory de commodified non utilitarian and non consequentialist The author proposes that it must not only assume the performative character of economics but also and especially its transformative purpose *Political Economy for Human Rights* will offer students academics activists and policy makers useful tools to understand some of the main contradictions of contemporary societies and new paths leading to a more just and fraternal world It will also be of great interest to the general public concerned with human rights and economic issues

The Philosophical Foundations of Ecological Civilization Arran Gare,2016-08-05 The global ecological crisis is the greatest challenge humanity has ever had to confront and humanity is failing The triumph of the neo liberal agenda together with a debauched scientism has reduced nature and people to nothing but raw materials instruments and consumers to be efficiently managed in a global market dominated by corporate managers media moguls and technocrats The arts and the humanities have been devalued genuine science has been crippled and the quest for autonomy and democracy undermined The resultant trajectory towards global ecological destruction appears inexorable and neither governments nor environmental movements have significantly altered this or indeed seem able to *The Philosophical Foundations of Ecological Civilization* is a wide ranging and scholarly analysis of this failure This book reframes the dynamics of the debate beyond the discourses of economics politics and techno science Reviving natural philosophy to align science with the humanities it offers the categories required to reform our modes of existence and our institutions so that we augment rather than undermine the life of the ecosystems of which we are part From this philosophical foundation the author puts forth a manifesto for

transforming our culture into one which could provide an effective global environmental movement and provide the foundations for a global ecological civilization From Economics to Political Economy Tim B. Thornton, 2016-07-22 The discipline of economics has been increasingly criticized for its inability to illuminate the workings of the real world and to provide reliable policy guidance for the major economic and social challenges of our time A central problem in contemporary economics and a problem from which many of its other failings flow is its lack of plurality By a lack of plurality it is meant that contemporary economics lacks diversity in its methods theories epistemology and methodology It is also meant that economics has become far less interdisciplinary From Economics to Political Economy offers an explanation as to why economics has become so determinedly non pluralistic and also gives considerable attention to exploring and evaluating promising strategies for reform These strategies include developing a pluralist economics under the label of political economy within other social science departments such as departments of politics Along the way the reader will learn about the worldwide student movement seeking greater pluralism in economics encounter some dramatic case studies in intellectual suppression gain a fuller sense of the nature of contemporary economics and explore the relationship between economics and other social sciences This book is of interest to any social scientist particularly those with interests in economics and politics American Book Publishing Record ,2006 Index to Theses with Abstracts Accepted for Higher Degrees by the Universities of Great Britain and Ireland and the Council for National Academic Awards ,2009 **Subject Index to Periodicals** ,2009 **Metaphors of Globalization** Markus Kornprobst, 2008-01-15 Metaphors of Globalization inquires into the power and politics of metaphors in the making of our globalizing era The approach is multidisciplinary with case studies in global finance global governance literary theory political theory anthropology and sociology By revisiting globalization through the analysis of metaphors this volume sheds new light on usually overlooked dimensions of global politics improves on many outdated conceptualizations and undertakes a critical analysis of existing approaches to the study of globalization *Science* John Michels (Journalist), 2008 A weekly record of scientific progress **Public Choice Concepts and Applications in Law** Maxwell L. Stearns, Todd J. Zywicki, 2009 Stearns and Zywicki s *Public Choice Concepts and Applications in Law* is the only course book specifically designed to instruct law students in the discipline of public choice The book provides a comprehensive but nontechnical overview of interest group theory social choice theory game theory and elementary price theory It ties these concepts to a wide range of topics in both public and private law The book contains chapters devoted to each set of methodological tools and specific institutional settings legislatures courts executive branch and bureaus and constitutions *The Radical Humanist* Manabendra Nath Roy, 2008 **The British National Bibliography** Arthur James Wells, 2009 *Book Review Index - 2009 Cumulation* Dana Ferguson, 2009-08 Book Review Index provides quick access to reviews of books periodicals books on tape and electronic media representing a wide range of popular academic and professional interests The up to date coverage wide scope and inclusion of citations for both newly
