Scientific and Technical Aerospace Reports , Review of Current Military Literature ,1940 **Military Review** ,1982 *Daily Report* ,1985 **Current Military Literature** ,1986 Comment and abstracts citations of important articles from international military and defence periodicals Library of Congress Subject Headings Library of Congress, Library of Congress. Subject Cataloging Division, 1980 *X-Planes* Manfred Griehl, 2012-10-24 Renowned German aviation specialist Manfred Griehl has collected a unique and valuable selection of photographs of Luftwaffe projects that never made it into battle. They remained on the drawing board or at prototype stage either because they were deemed unsuitable or the developers simply ran out of time and the projects never went into production. Most photographs come from the development sites and testing grounds of the major manufacturers of Nazi Germany companies such as Dornier, Junkers, Focke Wulf and Heinkel, all received funding from the government to develop bigger and faster aircraft. A huge amount of private testing went on with major organizations such as Daimler Benz, BMW and Siemens investing huge amounts in new engine systems and other advances such as radar. This book also details the innumerable alterations that were made to existing service aircraft to equip them for new roles. There are examples of Fw 190s developed for the delivery of chemical and toxic weapons, the high altitude Junkers EF 61, the early prototype WNF 342 helicopter as well as numerous examples of developmental jet fighters that could very well have been realized had it not been for the effectiveness of the Allied bombing campaign in restricting the supply of necessary materials. *Current Military & Political Literature* ,1990 **The Great War in the Air** John H. Morrow, 2009-01-13 Starting in 1909 with the beginnings of military aviation and the aviation industry and ending with their catastrophic postwar contraction, the book examines the totality of the air war: its heroism, romantic myths, politics, strategies and cost in men and materiel. John H. Morrow Jr also elaborates on the advancements in aircraft and engine technology and production during airpower's development into a viable and threatening military weapon within a decade of its origins. Complete with maps and battlefield photographs, these indispensable first-hand accounts provide a unique front-line record of Vietnam from its surreal horrors to the comradeship and courage forged in battle. From the jungles of Southeast Asia to life back in the United States as veterans of an unpopular war, *A Soldiers Story* also includes complete and updated biographies of the brave men who are profiled. This is a book that goes beyond the military and political implications of Vietnam to the truth of what the war cost and who actually paid the price. **The**
