Macroeconomics Andrew B. Abel, Olivier J. Blanchard, Ben Bernanke, Dean Croushore, 2014 Blanchard presents a unified and global view of macroeconomics enabling students to see the connections between the short run medium run and long run **The Economics of Money, Banking, and Financial Markets** Frederic S. Mishkin, 1989 **The Fed in Print**, 1997 **Bernanke's Test** Johan Van

Overtveldt, 2009-03-01 The consensus on Alan Greenspan's performance as Fed chair used to be extremely positive but more and more it's been called into question Now 2008 has seen Ben Bernanke in the eye of a storm that was created largely during Greenspan's tenure His management of the bubble of all bubbles will be a decisive factor in whether this crisis will be limited in its impact on the real economy or whether it directly leads to a major recession This is Bernanke's Test In examining the challenges facing Bernanke author Johan Van Overtveldt reviews Greenspan's long record as Fed chair as well as Ben Bernanke's career as an economist prior to replacing Greenspan The book offers much needed historical context by exploring the role and reach of the central banker and how former Fed chairmen Benjamin Strong William McChesney Martin Arthur Burns and especially Paul Volcker dealt with the same complex issues Bernanke faces today ***Inflation Reports and Models*** Mr. Ales Bulir, Jaromír Hurník, Katerina Smidkova, 2014-05-29 We offer a novel methodology for assessing the quality of inflation reports In contrast to the existing literature which mostly evaluates the formal quality of these reports we evaluate their economic content by comparing inflation factors reported by the central banks with ex post model identified factors Regarding the former we use verbal analysis and coding of inflation reports to describe inflation factors communicated by central banks in real time Regarding the latter we use reduced form new Keynesian models and revised data to approximate the true inflation factors Positive correlations indicate that the reported inflation factors were similar to the true model identified ones and hence mark high quality inflation reports Although central bank reports on average

identify inflation factors correctly the degree of forward looking reporting varies across factors time and countries

Money, the Financial System, and the Economy R. Glenn Hubbard, 2008 Hubbard's money and banking text emphasizes that students need to develop economic intuition in order to organize ideas evaluate current and historical events and predict outcomes in the economy This organizing principle gives students a way to think critically about developments in financial markets and institutions and in monetary institutions and policy The Sixth Edition continues to offer clear concise discussions of the theory and the latest data policy discussions and real world applications **Croushore Money and Banking Plus**
