 Understanding the New Debate brings together leading scholars to offer an introduction to a recent debate with far reaching
 implications for the study of history as well as our understanding of the present In the year 711 CE Islamic armies conquered
 the Iberian Peninsula This seemingly uncontroversial claim has in fact been questioned becoming an object of intense
 scholarly debate debate that has reached a fevered pitch in recent decades within Spain This volume introduces an
 anglophone audience to the terms and contours of this controversy from its emergence in the late nineteenth century to its
 contemporary recrudescence It suggests that far from an abstract discussion this dispute reveals methodological and moral
 questions that remain vital to the study of the distant past questions than cannot be easily resolved and have far reaching
 consequences for the present This volume offers novel perspectives on not only the controversy but also the latest research
 on the events of 711 These exemplary studies of historical literary and material cultural evidence demonstrate the promise
 and challenges for a new generation of scholarship The chapters in this book were originally published as a special issue of
