The Protective

Intelligence Advantage Fred Burton, Scott Stewart, 2025-10-24 The world reacted in horror to the graphic security camera footage of United Healthcare CEO Brian Thompson being gunned down on a Manhattan sidewalk as he was on his way to attend a scheduled investor conference. Contrary to many reports his murder was not the first attack against a CEO on American soil and it won't be the last. Since this murder has already spawned copycat attacks, The Protective Intelligence Advantage: Mitigating the Rising Threat to Prominent People is especially needed at this moment in time. In it, the authors outline various case examples of other executives, VIPs, and high profile figures who were victims of such attacks. The goal is to learn key elements from them, then outline exactly how individuals and security teams can utilize protective intelligence tools and their own behaviors, mindfulness, and awareness to protect themselves and their families from threats and imminent harm. This book will detail the essential security and awareness tools that any executive can learn what the authors dub protective intelligence led security, a model they designed. Since 1998, the authors have trained billionaires and Fortune 100 protection teams on the concept. After a lifetime of investigating attacks on high profile persons, heads of state, and celebrities and training others to prevent them, the authors will be the first to examine the murder of Brian Thompson in detail and use the lessons learned from that attack and others to illustrate how protective intelligence can be used to identify threats and prevent attacks.

1 Law 4 All Billy Angel, 2024-07-23 In Washington DC, Carol looked beautiful standing on the steps of the Lincoln Memorial next to Karl, her future husband. They were the consummate couple surrounded by the rest of the 1 Law Foundation members and several dozen friends. The day glowed with picture perfect memories for the taking. As Carol and Karl kiss to complete their vows, tragedy has already struck in Montana, launching the Foundation's next adventure. Days before the wedding in Montana at Carol's family multi-generational ranch, founded in the early 1800s, a mystery started unfolding. Disturbing events on the ranch lead the Foundation members on a trek across the state into Idaho. In Boise, the trail suddenly turns south, pointing to South America and Brazil. As their mystery unwinds, the foundation members must come to grips with the bizarre combination of Artificial Intelligence and Crispr technologies. These become enhanced with the aid of a supercharged Quantum Computer. Together, the Foundation members believe that these play creative roles trying to establish an international economic system. The Foundation investigates an organization that aspires to the goals of the Club of Rome with one major difference: Equality across economic, social, and political areas is not obtainable with a world on the abyss of destruction. The Group, organized in Europe before World War II, believes the only saving future for mankind is a feudalistic society managed by a master race of leaders. Questions arise as the Foundation members try to build a portfolio on this Group. Can this technically superior organization be uncovered and exposed? What makes the Group's far-reaching tentacles untouchable? Can they orchestrate the rise of international feudalism, making it universally accepted as the governmental standard? DC's a gripping tale that steers your imagination to unthinkable places. What kind of sinister mind-bending creations can this Group's Artificial Intelligence and Crispr technology harness with their unbridled Quantum Computer? The
