Netflix Same Day Delivery:

Netflixd Gina Keating,2012-10-11 Netflix has come a long way since 1997 when two Silicon Valley entrepreneurs Marc Ran dolph and Reed Hastings decided to start an online DVD store before most people owned a DVD player They were surprised and elated when launch day traffic in April 1998 crashed their server and resulted in 150 sales Today Netflix has more than 25 million subscribers and annual revenues above 3 billion Yet long term success or even survival is still far from guaranteed Journalist Gina Keating recounts the absorbing fast paced drama of the company s turbulent rise to the top and its attempt to invent two new kinds of business First it engaged in a grueling war against video store behemoth Blockbuster transforming movie rental forever Then it jumped into an even bigger battle for online video streaming against Google Hulu Amazon and the big cable companies Netflix ushered in such innovations as DVD rental by mail a patented online queue of upcom ing rentals and a recommendation algorithm called Cinematch that proved crucial in its struggle against bigger rivals Yet for all its success Netflix is still a polariz ing company Hastings is often heralded as a visionary he was named Business Person of the Year in 2010 by Fortune even as he has been called the nation s worst CEO Netflix also faces disgruntled customers after price increases and other stumbles that could tarnish the brand forever The quest to become the world s portal for pre mium video on demand will determine nothing less than the future of entertainment and the Internet Drawing on extensive new interviews and her years covering Netflix as a financial and entertainment reporter Keating makes this tale as absorbing as it is important

Top Down Innovation Mary J. Cronin,2014-01-02 This Brief focuses on strategies for innovation Top Down Innovation discusses the barriers to successful organizational and product innovation distills the leading theories about how to foster innovation and presents six case studies of well known brands that have succeeded and in one case failed in meeting innovation challenges Synthesizing the lessons learned from companies that have mastered innovation over time it provides a new perspective on the role of market leading companies and top management in driving innovation Since the publication of Clayton Christensen s pioneering Innovator s Dilemma in 1997 the rules of innovation have themselves been transformed Today innovation frequently starts at the CEO level with a vision that percolates throughout the organization In contrast to traditional theories of technology disruption new market entrants and business model innovation this study concludes that vision and leadership at the top is a decisive factor in successful innovation initiatives

System Error Rob Reich,Mehran Sahami,Jeremy M. Weinstein,2024-04-16 System Error is a triumph an analysis of the critical challenges facing our digital society that is as accessible as it is sophisticated Anne Marie Slaughter CEO of New America A forward thinking manifesto from three Stanford professors experts who have worked at ground zero of the tech revolution for decades which reveals how big tech s obsession with optimization and efficiency has sacrificed fundamental human values and outlines steps we can take to change course renew our democracy and save ourselves In no more than the blink of an eye a na ve optimism about technology s liberating potential has given way to a dystopian obsession

with biased algorithms surveillance capitalism and job displacing robots Yet too few of us see any alternative to accepting the onward march of technology We have simply accepted a technological future designed for us by technologists the venture capitalists who fund them and the politicians who give them free rein It doesn't need to be this way System Error exposes the root of our current predicament how big tech's relentless focus on optimization is driving a future that reinforces discrimination erodes privacy displaces workers and pollutes the information we get This optimization mindset substitutes what companies care about for the values that we as a democratic society might choose to prioritize Well intentioned optimizers fail to measure all that is meaningful and when their creative disruptions achieve great scale they impose their values upon the rest of us Armed with an understanding of how technologists think and exercise their power three Stanford professors a philosopher working at the intersection of tech and ethics a political scientist who served under Obama and the director of the undergraduate Computer Science program at Stanford also an early Google engineer reveal how we can hold that power to account Troubled by the values that permeate the university's student body and its culture they worked together to chart a new path forward creating a popular course to transform how tomorrow's technologists approach their profession Now as the dominance of big tech becomes an explosive societal conundrum they share their provocative insights and concrete solutions to help everyone understand what is happening what is at stake and what we can do to control technology instead of letting it control us
