When dividing exponents with same base, subtract the exponents

When raising a term to an outside power, multiply the exponents

Distribute the power to each variable and number inside the parenthesis

$$x^2 \cdot x^3 = x^{2+3} = x^5$$

$$\frac{x^5}{x^2} = x^{5-2} = x^3$$

$$(x^2)^3 = x^{2 \cdot 3} = x^6$$

$$(3x^2)^2 = 3^2 \cdot x^{2 \cdot 2} = 9x^4$$

A fraction to an outside power raise both top and bottom to the power

Zero Power
 Any (non-zero) term to the zero power is 1

Negative Exponents
 move to opposite side of fraction bar, exponent becomes positive

Remember

A History of Folding in Mathematics Michael Friedman, 2018-05-25 While it is well known that the Delian problems are impossible to solve with a straightedge and compass for example it is impossible to construct a segment whose length is cube root of 2 with these instruments the discovery of the Italian mathematician Margherita Beloch Piazzolla in 1934 that one can in fact construct a segment of length cube root of 2 with a single paper fold was completely ignored till the end of the 1980s This comes as no surprise since with few exceptions paper folding was seldom considered as a mathematical practice let alone as a mathematical procedure of inference or proof that could prompt novel mathematical discoveries A few questions immediately arise Why did paper folding become a non instrument What caused the marginalisation of this technique And how was the mathematical knowledge which was nevertheless transmitted and prompted by paper folding later treated and conceptualised Aiming to answer these questions this volume provides for the first time an extensive historical study on the history of folding in mathematics spanning from the 16th century to the 20th century and offers a general study on the ways mathematical knowledge is marginalised disappears is ignored or becomes obsolete In doing so it makes a valuable contribution to the field of history and philosophy of science particularly the history and philosophy of mathematics and is highly recommended for anyone interested in these topics
