China's Political Economy in Modern Times Kent G Deng, 2011-10-04 This book makes an important contribution to the study of changes in China s institutions and their impact on the national economy as well as ordinary people s daily material life from 1800 to 2000 Kent Deng reveals China s mega cycle of prosperity poverty prosperity without the usual attribution to the 1840 Opium War or the alleged population pressure class struggle and oriental despotism The book challenges the conventional view on rebellions revolutions and their alleged motivations and outcomes Its findings separate commonly circulated myth with reality based on solid evidence and careful evaluation The benchmark used by the author is people s entitlement and mundane day to day material well being instead of the stereotype of aggregates of industrial hardware and national GDP China s Political economy in Modern Times proves that state building was the prime mover in China s modern history Contrary to the popular belief in mass movement Deng shows convincingly that changes were in most cases imposed by a minority with external help Therefore the quality of the state was unpredictable seen from the anti state that cost lives and economic growth This book will be of interest to students and scholars of Chinese Politics Chinese Economics Chinese History and Political Economy

China under Xi Jinping, 2015-03-10 How will China develop under Xi Jinping s rule Is Xi Jinping and by extension the Chinese state now acting from a position of strength or weakness In other words do his policies appear to be the actions of a strong leader of an increasingly powerful nation Or are they the actions of an insecure one uncertain of how legitimate the state is in the eyes of the population over which it rules As with each of the

preceding volumes in this series this book is so valuable because it provides English language translations of the most prominent recent writings on these issues by China's leading scholars in the fields of international relations and political economy This volume is an invaluable resource to all those looking to gain a deeper and more nuanced understanding of where China is headed during the Xi Jinping era Allen Carlson Cornell University

Social Ties, Resources, and Migrant Labor Contention in Contemporary China Jeffrey Becker, 2014-07-22 The growth of China's internal migrant labor population is one of the most important issues emerging from the Hu Jintao regime As China continues to undergo an urbanization process as profound as any in modern history there is little doubt migrant workers are affecting economic and political decision making at the central and local levels Relying on interviews with over 250 Chinese migrant workers peasant farmers who have moved to the cities in search of work as well as interviews with Chinese labor activists this book explores the evolution of migrant labor protest in China over the past three decades It examines how migrant workers engage in protest today and how they choose from available protest strategies While past studies of Chinese rural to urban migration have long acknowledged the importance of traditional rural ties between family members this book demonstrates how new urban ties help migrant workers learn of new protest options navigate the legal system connect with others sharing similar disputes and identify additional resources The book also examines the growth and importance of Chinese migrant labor rights organizations and the role of information communication technology in migrant labor protest activity The findings presented here shed new light on Chinese state society relations and economic development Moreover the findings from this book which demonstrate how economic reforms create opportunities for protest and how migrant workers take advantages of these opportunities have implications for our understanding of contentious politics in other authoritarian states undergoing similar economic and demographic transition

Poverty and Exclusion of Minorities in China and India A.S. Bhalla, Dan Luo, 2017-10-04 This book a second edition includes new data from the 2010 Census of India and NSS reports on consumer expenditure 2011-12 health and education 2014 to examine poverty in China and India and how it connects with minorities Poverty has generally become less acute in both China and India thanks to an impressively rapid growth especially between 2010 and 2015 when the rest of the world including the US and the EU slowed down following the economic recession of 2008 But the issues of income and non income inequalities especially malnutrition in India marginalization and social exclusion remain as acute as ever in both countries As well as the use of new primary material in every chapter the book also critically examines new relevant studies and responds to global perspectives on

minority issues It canvasses a broad range of subjects from global terrorism and civil wars in Libya and Syria to the Arab Spring and the emergence of Islamic fundamentalism and the Islamic State ISIS

Emerging Capitalism in Central Europe and Southeast Asia F. Bafoil, 2015-12-24 This book examines the emergence of different forms of capitalism in Central Eastern states in Europe and Mekong states within the Association of Southeast Asian Nations ASEAN All of them but Thailand have historically disappeared from the regional maps for long periods of time due to colonial or imperial rule Most of them were previously members of a soviet type economy and they all joined ASEAN or the European Union in the 1990s or in the 2000s These states are characterized by a strong urge toward feelings of national sovereignty due to their experiences with colonialism and imperialism But due to the regional economic pressures and the globalization dynamic these states cannot articulate protectionist policies They are forced to open their economies in order to attract Foreign Direct Investments This results in less regulated and more political forms of capitalism than in some more developed capitalist countries This book analyzes forms of capitalism as the arising from a combination of three conditions the legacy of the foreign occupations the national construction process of the sovereign state and lastly the dynamics of regional integration These states claims to national sovereignty and the manner in which they developed suggests a causative link between the forms of political domination that have presided over these transformations and the forms of capitalism that have resulted

Educating the Children of Migrant Workers in Beijing Myra Pong, 2014-10-17 Educating the Children of Migrant Workers in Beijing is a timely book that addresses the gap in the provision of basic education to migrant children in China It examines the case of Beijing with a focus on policy implementation at the municipal and district levels and its impacts on migrant schools and their students Rural migrant workers in the cities usually lack local hukou household registration and face serious obstacles in accessing basic social services including schooling for their children The educational situation of these children however can vary both across and within localities and despite policies and regulations from the central government there have emerged broad and sometimes even extreme differences in the implementation of these policies at the local levels This book uses evidence from qualitative interviews and the analysis of policy documents and materials to provide readers with a rare glimpse into the local politics surrounding migrant children s education in China s political center including the nature of and motives behind policy implementation at the municipal and district levels and the implications for the survival and development of migrant schools in the city Educating the Children of Migrant Workers in Beijing is a unique and in depth contribution to an important area and will appeal to scholars and students across a range of disciplines including China studies migration studies education social policy and development studies as well as to practitioners and policymakers working on migrant issues and social welfare provision in China
