Fragilities

Fernando Dominguez Rubio, Jerome Denis, David Pontille, 2025-04-29 An original essay collection that explores the generative dimensions of fragility which can help reveal new life affirming politics and ethics At a time when it may be easy to fall into a defeatist melancholia if not outright pessimism fragility offers an opportunity for a different kind of world making In *Fragilities* Fernando Dominguez Rubio Jerome Denis and David Pontille argue that we need to pay attention to the moments when the bodies things and worlds we inhabit begin to crack and reveal their fragility it is in these instabilities that we can gain precious access to alternative ways of being The essays in this collection explore how the work of care maintenance and repair compose with rather than struggle against fragilities Fragility forces us to reckon with the precariousness and contingency of life and to use this reckoning as a starting point to build and nurture life affirming politics and ethics The book explores fragility in four categories bodies environments labor and politics and proposes to consider in each situation what who is rendered visible what who is made absent what is considered normal and what is deemed strong and stable versus what is deemed fragile The volume includes a strong line up of leading and emerging scholars from a wide array of disciplines including anthropology social studies of science disabilities studies and sociology

Baudrillard Now

Ryan Bishop, 2013-04-17 The writings of Jean Baudrillard have dramatically altered the face of critical theory and promise to pose challenges well into the 21st century His work on simulation media the status of the image the system of objects hyperreality and information technology continues to influence intellectual work in a diverse set of fields This volume uniquely provides overviews of Baudrillard's career while also simultaneously including examples of current works on and with Baudrillard that

engage some of the many and varied ways Baudrillard's work is being addressed deployed and critiqued in the present. As such it offers chapters useful to the novice and the well versed in critical theory and Baudrillard Studies alike. Contributors to the volume include John Armitage John Beck Ryan Bishop Doug Kellner John Phillips and Mark Poster. No less controversial today than he was in the past Baudrillard continues to divide intellectuals and academicians an issue this volume addresses by re engaging the writing itself without falling into either simplistic dismissal or solipsistic cheerleading but rather by taking the fecundity operative in the thought and meeting its consistent challenge Baudrillard Now provokes sustained interaction with one of philosophy's most important provocative and stimulating thinkers.

War and Aesthetics Jens Bjerling, Anders Engberg-Pedersen, Solveig Gade, Christine Strandmose Toft, 2024-06-18. A provocative edited collection that takes an original approach toward the black box of military technology surveillance and AI and reveals the aesthetic dimension of warfare. War and Aesthetics gathers leading artists political scientists and scholars to outline the aesthetic dimension of warfare and offer a novel perspective on its contemporary character and the construction of its potential futures. Edited by a team of four scholars Jens Bjerling Anders Engberg Pedersen Solveig Gade and Christine Strandmose Toft this timely volume examines warfare through the lens of aesthetics arguing that the aesthetic configurations of perception technology and time are central to the artistic engagement with warfare just as they are key to military AI weaponry and satellite surveillance. People mostly think of war as the violent manifestation of a political rationality. But when war is viewed through the lens of aesthesis meaning perception and sensibility military technology becomes an applied science of sensory cognition. An outgrowth of three war seminars that took place in Copenhagen between 2018 and 2021 War and Aesthetics engages in three main areas of inquiry the rethinking of aesthetics in the field of art and in the military sphere the exploration of techno aesthetics and the wider political and theoretical implications of war technology and finally the analysis of future temporalities that these technologies produce. The editors gather various traditions and perspectives ranging from literature to media studies to international relations creating a unique historical and scientific approach that broadly traces the entanglement of war and aesthetics across the arts social sciences and humanities from ancient times to the present. As international conflict looms between superpowers War and Aesthetics presents new and illuminating ways to think about future conflict in a world where violence is only ever a few steps away. Contributors Louise Amoore Ryan Bishop Jens Bjerling James Der Derian Anthony Downey Anders Engberg Pedersen Solveig Gade Mark B Hansen Caroline Holmqvist Vivienne Jabri Caren Kaplan Phil Klay Kate McLoughlin Elaine Scarry Christine Strandmose Toft Joseph Vogl Arkadi Zaides.

The Logic of Slavery Tim Armstrong, 2012-08-27. In American history and throughout the Western world the subjugation perpetuated by slavery has created a unique culture of slavery. That culture exists as a metaphorical artistic and literary tradition attached to the enslaved human beings whose lives are owed to another who are used as instruments by another and who must endure suffering in silence. Tim Armstrong explores the metaphorical legacy of slavery in American culture by investigating debt

technology and pain in African American literature and a range of other writings and artworks Armstrong's careful analysis reveals how notions of the slave as a debtor lie hidden in our accounts of the commodified self and how writers like Nathaniel Hawthorne Rebecca Harding Davis Booker T. Washington W. E. B. Du Bois Ralph Ellison and Toni Morrison grapple with the pervasive view that slaves are akin to machines

Downtime Mark Goble, 2025-06-17 Slow motion has become perhaps the least special effect in film and media a stylistic technique for showing violence dream sequences and

flashbacks or other experiences outside ordinary time We see so much slow motion on our screens today that we can look past its history and forget how rare it was before the 1960s when films such as *The Wild Bunch* *Bonnie and Clyde* and *2001 A Space Odyssey* helped it explode in popularity at a moment of cultural change and social upheaval This ambitious book tells the story of slow motion tracing a broader fascination with the uneven speeds of modern life and our ability to comprehend them *Downtime* explores the history and aesthetics of slow motion from its origins in early film to its prominence today Mark Goble argues that the effect's sudden visibility after 1968 registers experience of modernity as a period of perpetual acceleration that somehow makes even the smallest intervals of time feel endless Ranging across literature art and cinema including novels by William Faulkner Don DeLillo and W G Sebald as well as Robert Smithson's *Spiral Jetty* and Julie Dash's *Daughters of the Dust* he describes how writers and filmmakers depict the velocities and durations of contemporary life Goble reveals the twentieth century and its aftermath as figured in slow motion rushing past and deliriously delayed everything going fast and slow at once *Downtime* is about time and its technologies in an accelerated world that can advance only in slow motion

Martial Aesthetics Anders Engberg-Pedersen, 2023-03-07 The twenty first century has witnessed a pervasive militarization of aesthetics with Western military institutions co-opting the creative worldmaking of art and merging it with the destructive forces of warfare In *Martial Aesthetics* Anders Engberg Pedersen examines the origins of this unlikely merger showing that today's creative warfare is merely the extension of a historical development that began long ago Indeed the emergence of martial aesthetics harkens back to a series of inventions ideas and debates in the eighteenth and early nineteenth century Already then military thinkers and inventors adopted ideas from the field of aesthetics about the nature purpose and force of art and retooled them into innovative military technologies and a new theory that conceptualized war not merely as a practical art but as an aesthetic art form This book shows how military discourses and early war media such as star charts horoscopes and the Prussian wargame were entangled with ideas of creativity genius and possible worlds in philosophy and aesthetic theory by thinkers such as Leibniz Baumgarten Kant and Schiller in order to trace the emergence of martial aesthetics Adopting an approach that is simultaneously historical and theoretical Engberg Pedersen presents a new frame for understanding war in the twenty first century

Vertical Stephen Graham, 2016-11-08 A revolutionary reimagining of the cities we live in the air above us and what goes on in the earth beneath our feet Today we live in a world that can no longer be read as a two dimensional map but must now be understood as a series of vertical strata that reach from the satellites that encircle our planet to the tunnels deep within the ground In *Vertical* Stephen Graham rewrites the city at every level how the geography of inequality politics and identity is determined in terms of above and below Starting at the edge of earth's atmosphere and in a series of riveting studies descending through each layer Graham explores the world of drones the city from the viewpoint of an aerial bomber the design of sidewalks and the hidden depths of underground bunkers He asks why was Dubai built to be seen from Google Earth How do the super rich in S o Paulo live in

their penthouses far above the street Why do London billionaires build vast subterranean basements And how do the technology of elevators and subversive urban explorers shape life on the surface and subsurface of the earth Vertical will make you look at the world around you anew this is a revolution in understanding your place in the world **The City as Target** Ryan Bishop, Gregory Clancey, John W. Phillips, 2012-03-29 Bringing together scholars from a diverse range of disciplines The City as Target provides a sustained and critical response to the relationship between the concept of targeting in its many forms and notions of understanding imagining and shaping the urban Among the many spatial and graphic terms used to describe cities in urban studies the word target is rarely encountered Though equally spatial it differs from these others by implying some motive force and more than that a force with some intentionality To target is to aim to project and ultimately to impact It suggests a space of violence or at least action or movement resulting in displacement which most other terms do not In that sense it is useful underused and perhaps revelatory Rather than approach the city as simply a site of growth processes and developments the contributors to this volume treat it as the recipient of attentions The work draws on a wide variety of geographical sites and historic monuments in order to explore this concept examining and challenging current urban theories It seeks to highlight both the power of The Global City and the current vulnerability and fragility of urban culture exploring the city as a recipient and a culprit in relation to issues including terrorism and urban warfare the latest cyclical failure of global financial markets and the relatively new spectre of environmental unsustainability Offering a unique and relevant contribution to the literature this work will be of great interest to scholars of urban theory international relations postcolonial politics and military studies **An Introduction to Literature, Criticism and Theory** Andrew Bennett, Nicholas Royle, 2016-03-02 Lively original and highly readable An Introduction to Literature Criticism and Theory is the essential guide to literary studies Starting at The Beginning and concluding with The End chapters range from the familiar such as Character Narrative and The Author to the more unusual such as Secrets Pleasure and Ghosts Now in its fifth edition Bennett and Royle's classic textbook successfully illuminates complex ideas by engaging directly with literary works so that a reading of Jane Eyre opens up ways of thinking about racial difference for example while Chaucer Raymond Chandler and Monty Python are all invoked in a discussion of literature and laughter The fifth edition has been revised throughout and includes four new chapters Feelings Wounds Body and Love to incorporate exciting recent developments in literary studies In addition to further reading sections at the end of each chapter the book contains a comprehensive bibliography and a glossary of key literary terms A breath of fresh air in a field that can often seem dry and dauntingly theoretical this book will open the reader's eyes to the exhilarating possibilities of reading and studying literature

Nethered Regions - An Anatomy of Mina Loy Sara Crangle, 2024-04-30 Mina Loy has long been recognised as a writer who insists on the primacy of the corporeal Over two volumes Sara Crangle excavates how Loy's relationship to the human body was inextricable from her esoteric understanding of the human soul Nethered Regions An Anatomy of Mina Loy
