*Moduli Spaces and Arithmetic Dynamics* Joseph H. Silverman, 2012 This monograph studies moduli problems associated to algebraic dynamical systems It is an expanded version of the notes for a series of lectures delivered at a workshop on Moduli Spaces and the Arithmetic of Dynamical Systems at the Bellairs Research Institute Barbados in 2010 The author's goal is to provide an overview with enough details and pointers to the existing literature to give the reader an entry into this exciting area of current research Topics covered include 1 Construction and properties of dynamical moduli spaces for self maps of projective space 2 Dynatomic modular curves for the space of quadratic polynomials 3 The theory of canonical heights associated to dynamical systems 4 Special loci in dynamical moduli spaces in particular the locus of post critically finite maps 5 Field of moduli and fields of definition for dynamical systems

Joseph H. Silverman, The Arithmetic of Polynomial Dynamical Pairs Charles Favre, Thomas Gauthier, 2022-06-14 New mathematical research in arithmetic dynamics In *The Arithmetic of Polynomial Dynamical Pairs* Charles Favre and Thomas Gauthier present new mathematical research in the field of arithmetic dynamics Specifically the authors study one dimensional algebraic families of pairs given by a polynomial with a marked point Combining tools from arithmetic geometry and holomorphic dynamics they prove an unlikely intersection statement for such pairs thereby demonstrating strong rigidity features for them They further describe one dimensional families in the moduli space of polynomials containing infinitely many postcritically finite parameters proving the dynamical Andr Oort conjecture for curves in this context originally stated by Baker and DeMarco This is a reader friendly invitation to a new and exciting research area that brings together sophisticated tools from many branches of mathematics

**Mathematical Reviews** , 2005 Moduli Spaces of Riemann Surfaces Benson Farb, Richard Hain, Eduard Looijenga, 2013-08-16 Mapping class groups and moduli spaces of Riemann surfaces were the topics of the Graduate Summer School at the 2011 IAS Park City Mathematics Institute This book presents the nine different lecture series comprising the

summer school covering a selection of topics of current interest The introductory courses treat mapping class groups and Teichmüller theory The more advanced courses cover intersection theory on moduli spaces the dynamics of polygonal billiards and moduli spaces the stable cohomology of mapping class groups the structure of Torelli groups and arithmetic mapping class groups The courses consist of a set of intensive short lectures offered by leaders in the field designed to introduce students to exciting current research in mathematics These lectures do not duplicate standard courses available elsewhere The book should be a valuable resource for graduate students and researchers interested in the topology geometry and dynamics of moduli spaces of Riemann surfaces and related topics Titles in this series are co published with the Institute for Advanced Study Park City Mathematics Institute Members of the Mathematical Association of America MAA and the National Council of Teachers of Mathematics NCTM receive a 20% discount from list price Algebraic Structures and Moduli Spaces Jacques Hurtubise, 2004 This book contains recent and exciting developments on the structure of moduli spaces with an emphasis on the algebraic structures that underlie this structure Topics covered include Hilbert schemes of points moduli of instantons coherent sheaves and their derived categories moduli of flat connections Hodge structures and the topology of affine varieties Two beautiful series of lectures are a particularly fine feature of the book One is an introductory series by Manfred Lehn on the topology and geometry of Hilbert schemes of points on surfaces and the other by Hiraku Nakajima and Kota Yoshioka explains their recent work on the moduli space of instantons over  $\mathbb{R}^4$  The material is suitable for graduate students and researchers interested in moduli spaces in algebraic geometry topology and mathematical physics

On the Compactification of Moduli Spaces for Algebraic K3 Surfaces Francesco Scattone, 1987 *Moduli Spaces and Arithmetic Geometry (Kyoto, 2004)* Shigeru Mukai, 2006 Since its birth algebraic geometry has been closely related to and deeply motivated by number theory Particularly the modern study of moduli spaces and arithmetic geometry have many important techniques and ideas in common With this close relation in mind the RIMS conference Moduli Spaces and Arithmetic Geometry was held at Kyoto University during September 8-15, 2004 as the 13th International Research Institute of the Mathematical Society of Japan This volume is the outcome of this conference and consists of thirteen papers by invited speakers including C Soulé, A Beauville and C Faber and participants All papers with two exceptions by C Voisin and Yoshinori Namikawa treat moduli problem and or arithmetic geometry Algebraic curves Abelian varieties algebraic vector bundles connections and D modules are the subjects of those moduli papers Arakelov geometry and rigid geometry are studied in arithmetic papers In the two exceptions integral Hodge classes on Calabi-Yau threefolds and symplectic resolutions of nilpotent orbits are studied Published by Mathematical Society of Japan and distributed by World Scientific Publishing Co for all markets except North America *Grassmannians, Moduli Spaces and Vector Bundles* David Ellwood, Emma Previato, 2011 This collection of cutting edge articles on vector bundles and related topics originated from a CMI workshop held in October 2006 that brought together a community indebted to the pioneering work of P E Newstead visiting the

United States for the first time since the 1960s Moduli spaces of vector bundles were then in their infancy but are now as demonstrated by this volume a powerful tool in symplectic geometry number theory mathematical physics and algebraic geometry In fact the impetus for this volume was to offer a sample of the vital convergence of techniques and fundamental progress taking place in moduli spaces at the outset of the twenty first century This volume contains contributions by J E Andersen and N L Gammelgaard Hitchin s projectively flat connection and Toeplitz operators M Aprodu and G Farkas moduli spaces D Arcara and A Bertram stability in higher dimension L Jeffrey intersection cohomology J Kamnitzer Langlands program M Lieblich arithmetic aspects P E Newstead coherent systems G Pareschi and M Popa linear series on Abelian varieties and M Teixidor i Bigas bundles over reducible curves These articles do require a working knowledge of algebraic geometry symplectic geometry and functional analysis but should appeal to practitioners in a diversity of fields No specialization should be necessary to appreciate the contributions or possibly to be stimulated to work in the various directions opened by these path blazing ideas to mention a few the Langlands program stability criteria for vector bundles over surfaces and threefolds linear series over abelian varieties and Brauer groups in relation to arithmetic properties of moduli spaces

Moduli of Curves and Abelian Varieties Carel Faber, Eduard Looijenga, 2012-12-06 The present volume with contributions of R Dijkgraaf C Faber G van der Geer R Rain E Looijenga and F Oort originates from the Dutch Intercity Seminar on Moduli year 1995 96 Some of the articles here were discussed in preliminary form in the seminar others are completely new Two introductory papers on moduli of abelian varieties and on moduli of curves accompany the articles Topics include a stratification of a moduli space of abelian varieties in positive characteristic and the calculation of the classes of the strata tautological classes for moduli of abelian varieties as well as for moduli of curves correspondences between moduli spaces of curves locally symmetric families of curves and jacobians and the role of symmetric product spaces in quantum field theory string theory and matrix theory This Intercity Seminar is part of the long term project Algebraic curves and Riemann surfaces geometry arithmetic and applications sponsored by the Netherlands Organization for Scientific Research NWO that has been running since 1994 Its ancestry can be traced back to joint activities in the seventies if not earlier which as of 1980 had evolved into active biweekly research seminars These have been a focal point of Dutch algebraic geometry and singularity theory since We are grateful to NWO for its support for the project C F thanks the Max Planck Institut für Mathematik Bonn for support during the final stages of the preparation of this volume

presented In the second some questions on the boundary of moduli spaces of surfaces are addressed Finally the theory of stable quotients is explained which yields meaningful compactifications of moduli spaces of maps Both advanced graduate students and researchers in algebraic geometry will find this book a valuable read     Moduli of Vector Bundles Masaki Maruyama,1996-04-23 Contains papers presented at the 35th Taniguchi International Symposium held recently in Sanda and Kyoto Japan Details the latest developments concerning moduli spaces of vector bundles or instantons and their application Covers a broad array of topics in both differential and algebraic geometry     **Moduli Spaces and Vector Bundles** Steve Bradlow,2009-05-21 Coverage includes foundational material as well as current research authored by top specialists within their fields     **Compact Moduli Spaces and Vector Bundles** Valery Alexeev,2012 This book contains the proceedings of the conference on Compact Moduli and Vector Bundles held from October 21 24 2010 at the University of Georgia This book is a mix of survey papers and original research articles on two related subjects Compact Moduli spaces of algebraic varieties including of higher dimensional stable varieties and pairs and Vector Bundles on such compact moduli spaces including the conformal block bundles These bundles originated in the 1970s in physics the celebrated Verlinde formula computes their ranks Among the surveys are those that examine compact moduli spaces of surfaces of general type and others that concern the GIT constructions of log canonical models of moduli of stable curves The original research articles include among others papers on a formula for the Chern classes of conformal classes of conformal block bundles on the moduli spaces of stable curves on Looijenga's conjectures on algebraic and tropical Brill Noether theory on Green's conjecture on rigid curves on moduli of curves and on Steiner surfaces     The Moduli Space of Cubic Threefolds as a Ball Quotient Daniel Allcock,James A.
