Studies in Macroeconomic Theory Volume 1 Employment and Inflation is a collection of scholarly papers that accounts the development of a microeconomic theory of wage and price decisions and commitments The book presents some features of the modern inflationary process and makes sense of some still accepted elements in the postclassical macroeconomics of Keynes and Phillips The papers in this volume are grouped into seven sections Part I describes disequilibrium models of employment Part II gives closer scrutiny to the idea of the natural rate of unemployment Part III studies the welfare economics of inflation in an equilibrium context The fourth part deals with inflation planning The papers in Part V discuss hypotheses about the causes of the rise in the rate of inflation in two historical episodes the American inflation between 1955 1957 and 1972 1974 Part VI addresses some questions in the theory of economic stabilization by monetary and fiscal policy The final section of this volume attempts to apply to matters of stochastic social choice stabilization policy being one instance of such a choice the conception of justice advanced by Rawls The compendium will be of value to economists and economic policy makers

Money Employment and Inflation Robert J. Barro,Herschel I. Grossman,1976-03-26 This is a textbook on macroeconomic theory that attempts to rework the theory of macroeconomic relations through a re examination of their microeconomic foundations In the tradition of Keynes s General Theory of Employment Interest and Money published in 1936 and Patinkin s Money Interest and Prices published in 1956 and revised in 1965 this book represents a third generation of macroeconomic theory This book presents a comprehensive choice theoretic analysis of the determination of the level of employment and the rate of inflation A central feature of the book is the recasting of macroeconomic analysis in terms of a theory of exchange under non market clearing conditions In addition the analysis incorporates other aspects of the current reformulation of macroeconomic theory including the relation between inflationary expectations rates of return and unemployment the dynamics of aggregate demand and the significance of incomplete information regarding the spatial distribution of wages and prices

Employment without Inflation Benjamin Higgins, 2018-01-16 The world economy has undergone a fundamental transformation in recent decades and theoretical structures inherited from the 1930s through the 1950s while retaining large elements of truth are inadequate to deal with current problems Benjamin Higgins feels that for a society such as the United States a fiscal policy needs to be adopted that can deal simultaneously with existing unemployment and inflation He suggests three possible governmental policies stimulating a high rate of long run growth by use of reward innovations and by maintaining the highest possible level of scientific and technical activity isolating regions that are generators of inflation and others that are pools for unemployment and establishing a system of direct controls similar to those used in wartime Higgins describes the transformation of the cogent prewar business cycle with its alternations of inflation or unemployment then a transitional period of underemployment equilibrium and secular stagnation and finally the strange new world of today one with economic fluctuations in the form of shifting trade off curves and loops He then applies his new paradigm to current problems showing why they cannot be managed through macroeconomic monetary and fiscal policy Higgins offers case studies of efforts to fight inflation and unemployment and to reduce regional gaps to show their strengths and weaknesses It can be said that unemployment always results from too many people chasing too few jobs and inflation is always caused by too much money chasing too few goods and services Beyond such banal generalizations Higgins maintains there is no single

cause for either unemployment or inflation and thus no single cure can be prescribed for either let alone for both at once Nor is it to be expected that the appropriate cure will prove to be the same in all countries at all times He suggests that an optimal blend of monetary and fiscal policy that will produce the minimum discomfort is a good start Employment Without Inflation will be of direct policy interest to economists sociologists and national planners **MONEY, INFLATION AND EMPLOYMENT** Robert Joseph BARRO, *Inflation, Growth, and Employment* Joseph W.
