Monitoring Ecological Impacts Concepts And Practice In Flowing Waters:

Monitoring Ecological Impacts Barbara J. Downes, 2002 Monitoring Ecological Impacts provides the tools needed to design assessment programs that can reliably monitor detect and allow management of human impacts on the natural environment The procedures described are well grounded in inferential logic Step by step guidelines and flow diagrams provide clear and useable protocols which are applicable to real situations

Ecosystem Response Modelling in the Murray-Darling Basin Neil Saintilan, Ian Overton, 2010 Ecosystem Response Modelling in the Murray Darling Basin provides an overview of the status of science in support of water management in Australia s largest and most economically important river catchment and brings together the leading ecologists working in the rivers and wetlands of the Basin It introduces the issues in ecosystem response modelling and how this area of science can support environmental watering decisions The declining ecological condition of the internationally significant wetlands of the Murray Darling Basin has been a prominent issue in Australia for many years Several high profile government programs have sought to restore the flow conditions required to sustain healthy wetlands and this book documents the scientific effort that is underpinning this task In the Southern Murray Darling Basin the River Murray the Murrumbidgee River and their associated wetlands and floodplains have been the focus of the Murray Darling Basin Authority s The Living Murray program and the NSW Rivers Environmental Restoration Program The book documents research aimed at informing environmental water use in a number of iconic wetlands including those along the Murray the Barmah Millewa Forest the Chowilla Floodplain and Lindsay Wallpolla Islands the Coorong and Murray mouth and the Murrumbidgee the Lowbidgee Floodplain Within the Northern Murray Darling Basin research conducted in support of the Wetland Recovery Plan and the NSW Rivers Environmental Restoration Program has improved our knowledge of the Gwydir Wetlands and the Macquarie Marshes and the water regimes required to sustain their ecology

River Science David J. Gilvear, Malcolm T. Greenwood, Martin C. Thoms, Paul J. Wood, 2016-05-02 River Science is a rapidly developing interdisciplinary field at the interface of the natural sciences engineering and socio political sciences It recognises that the sustainable management of contemporary rivers will increasingly require new ways of characterising them to enable engagement with the diverse range of stakeholders This volume represents the outcome of research by many of the authors and their colleagues over the last 40 years and demonstrates the integral role that River Science now plays in underpinning our understanding of the functioning of natural ecosystems and how societal demands and historic changes have affected these systems The book will inform academics policy makers and society in general of the benefits of healthy functioning riverine systems and will increase awareness of the wide range of ecosystem goods and services they provide

Living in a Dynamic Tropical Forest Landscape Nigel Stork, Stephen M. Turton, 2009-01-26 This book brings together a wealth of scientific findings and ecological knowledge to survey what we have learned about the Wet Tropics rainforests of North Queensland Australia This interdisciplinary text is the first book to provide such a holistic view of any tropical forest

environment including the social and economic dimensions The most thorough assessment of a tropical forest landscape to date Explores significant scientific breakthroughs in areas including conservation genetics vegetation modeling agroforestry and revegetation techniques biodiversity assessment and modeling impacts of climate change and the integration of science in natural resource management Research achieved in part due to the Cooperative Research Centre for Tropical Rainforest Ecology and Management the Rainforest CRC Written by a number of distinguished international experts contains chapter summaries and section commentaries Learning from agri-environment schemes in Australia Dean Ansell, Fiona Gibson, David Salt, 2016-05-10 Learning from agri environment schemes in Australia is a book about the birds and the beef more specifically it is about the billions of dollars that governments pay farmers around the world each year to protect and restore biodiversity After more than two decades of these schemes in Australia what have we learnt Are we getting the most out of these investments and how should we do things differently in the future Involving contributions from ecologists economists social scientists restoration practitioners and policymakers this book provides short engaging chapters that cover a wide spectrum of environmental agricultural and social issues involved in agri environment schemes *River Futures* Gary J. Brierley, Kirstie A. Fryirs, 2012-09-26 Across much of the industrialized world rivers that were physically transformed and ecologically ruined to facilitate industrial and agricultural development are now the focus of restoration and rehabilitation efforts River Futures discusses the emergence of this new era of river repair and documents a comprehensive biophysical framework for river science and management The book considers what can be done to maximize prospects for improving river health while maintaining or enhancing the provision of ecosystem services over the next fifty to one hundred years It provides a holistic overview of considerations that underpin the use of science in river management emphasizing cross disciplinary understanding that builds on a landscape template The book frames the development of integrative river science and its application to river rehabilitation programs develops a coherent set of guiding principles with which to approach integrative river science considers the application of cross disciplinary thinking in river rehabilitation experiences from around the world examines the crossover between science and management outlining issues that must be addressed to promote healthier river futures Case studies explore practical applications in different parts of the world highlighting approaches to the use of integrative river science measures of success and steps that could be taken to improve performance in future efforts River Futures offers a positive practical and constructive focus that directly addresses the major challenge of a new era of river conservation and rehabilitation that of bringing together the diverse and typically discipline bound sets of knowledge and practices that are involved in repairing rivers It is a valuable resource for anyone involved in river restoration and management including restorationists scientists managers and policymakers as well as undergraduate and graduate students Methods in Stream Ecology Gary Lamberti, F.
