practical tests with confidence In short part 3 will provide the prospective data engineer with detailed knowledge on setting up and configuring DataProc GCPs version of the Spark Hadoop ecosystem for big data They will also learn how to build and test streaming and batch data pipelines using pub sub dataFlow and BigQuery Furthermore they will learn how to integrate all the ML and AI Platform components and APIs They will be accomplished in connecting data analysis and visualisation tools such as Datalab DataStudio and AI notebooks amongst others They will also by now know how to build and train a TensorFlow DNN using APIs and Keras and optimise it to run large public data sets Also they will know how to provision and use Kubeflow and Kube Pipelines within Google Kubernetes engines to run container workloads as well as how to take advantage of serverless technologies such as Cloud Run and Cloud Functions to build transparent and seamless data processing platforms The best part of the book though is its compartmental design which means that anyone from a beginner to an intermediate can join the book at whatever point they feel comfortable
