American Universities in a Global Market Charles T. Clotfelter, 2010-04-28 In higher education the United States is the preeminent global leader dominating the list of the world's top research universities. But there are signs that America's position of global leadership will face challenges in the future as it has in other realms of international competition. *American Universities in a Global Market* addresses the variety of issues crucial to understanding this preeminence and this challenge. The book examines the various factors that contributed to America's success in higher education including openness to people and ideas, generous governmental support, and a tradition of decentralized, friendly competition. It also explores the advantages of holding a dominant position in this marketplace and examines the current state of American higher education in a comparative context, placing particular emphasis on how market forces affect universities. By discussing the differences in quality among students and institutions around the world, this volume sheds light on the singular aspects of American higher education.

World University Rankings and the Future of Higher Education Downing, Kevin, Ganotice, Jr., Fraide A., 2016-10-06 Delivering quality education to students while remaining competitive at an international level is only one of the many challenges universities face today. To attain their goals, universities must adopt new strategies to achieve academic excellence. *World University Rankings and the Future of Higher Education* is a pivotal reference source for the latest scholarly research on the implementation of a ranking system for higher education institutions, providing a thorough overview of the impacts of these rankings on educational quality. Exploring the benefits and challenges of this system in a global context, this book is ideally designed for academicians, researchers, students, administrators, and policy makers interested in the effects of university rankings in the education sector and beyond.

Rethinking International Skilled Migration Micheline van Riemsdijk, Qingfang Wang, 2016-10-04 In today's global knowledge economy, competition for the best and brightest workers has intensified. Highly skilled workers are an asset to companies, knowledge institutions, cities, and regions as they contribute to knowledge creation, innovation, and economic growth and development. Skilled migrants cross and many times straddle international borders to pursue professional opportunities. These spatial relocations provide opportunities and challenges for migrants and the cities and regions they inhabit. How have international skilled migratory flows been formed, sustained, and transformed over multiple spaces and scales? How have these processes affected cities and regions? And how have multiple stakeholders responded to these processes? The contributors to this book bring together perspectives from economic, social, urban, and population geography in order to address these questions from a myriad of angles. Empirical case studies from different regions illuminate the multiscaled processes of international skilled migration. In particular, the contributions rethink skilled migration theories and provide insights into the experiences of highly skilled labor migrants and international students, issues related to transnational activities and return migration, and policy implications for both immigrant source and destination countries. It also charts a future research agenda for international skilled migration.

research Rethinking International Skilled Migration provides a comparative perspective on the experiences of skilled migrants across the local regional national and or global scale paying particular attention to spatial and place based dimensions of international skilled migration It will be of interest to scholars and professionals in international migration regional and national development policymakers international businesses and NGOs *Sustainability Assessment in Higher Education Institutions* Sandra Caeiro,Ulisses Miranda Azeiteiro,2020-12-10 This Special Issue Sustainability Assessment in Higher Education Institutions provides peer reviewed research from several geographies and institutions and covering various topics with the broad objective of achieving an assessment of the effectiveness and impact of different implementation dimensions measuring and evaluating how sustainability is being applied in practice A set of nine papers covering sustainability education interdisciplinary teaching sustainable assessment governance strategies commitments and practices and social responsibility at higher education institutions contribute significantly to this area of knowledge *U.S. News & World Report* ,1991 **How to Help Your Child Land the Right Job** Nella Barkley,1993-01-01 A guide to helping one s grown child find a job encourages parents to help their children assess their abilities and skills and offers advice on re a7sume a7s and interviews Original **How to Build a Global City** Michele Acuto,2022-01-15 In How to Build a Global City Michele Acuto considers the rise of a new generation of so called global cities Singapore Sydney and Dubai and the power that this concept had in their ascent in order to analyze the general relationship between global city theory and its urban public policy practice The global city is often invoked in theory and practice as an ideal model of development and a logic of internationalization for cities the world over But the global city also creates deep social polarization and challenges how much local planning can achieve in a world economy Presenting a unique elite ethnography in Singapore Sydney and Dubai Acuto discusses the global urban discourses aspirations and strategies vital to the planning and management of such metropolitan growth The global city he shows is not one single idea but a complex of ways to imagine a place to be global and aspirations to make it so often deeply steeped in politics His resulting book is a call to reconcile proponents and critics of the global city toward a more explicit engagement with the politics of this global urban imagination **Pakistan & Gulf Economist** ,2006 [Tip, a Biography of Thomas P.
