Falls in Older Adults: Prevention and Risk Evaluation Tzvi Dwolatzky,2023-10-16 Falls are a major health challenge and represent the leading cause of accidental death in older adults It is essential to identify those factors associated with an increased risk for falls and to develop specific programs for fall prevention The risk of falling can be assessed in older adults using different parameters including biological psychosocial socioeconomic behavioral and environmental factors For example the risk of falls increases when vision is impaired when sleep quality is poor or when mood is depressed Moreover physical parameters such as changes in body mass and blood pressure are risk factors for falls in older adults

New Insights into Fibromyalgia William S. Wilke,2012-01-05 Given the potential problems that can obscure any scientific enterprise inconsistent results across studies are bound to occur How are we to decide what is true Let s turn to philosophy for a reasonable answer The mathematician philosopher Bertrand Russell approached a similar problem in his monograph *The Problems of Philosophy* Russell B 1912 He addressed the following question How do we know that anything is real Is the only reality subjective and simply in our minds as Bishop Berkley challenged or can we mostly believe the objective reality His pragmatic answer All possibilities may be true but when the preponderance of evidence indicates that objective reality and knowledge are the most probable case go with it If the preponderance of all evidence about the clinical description of fibromyalgia and it s pathogenic mechanisms and treatment strategies indicate a highly probable interrelated hypothesis go with it The direction of the literature on the whole trumps the less likely tangents At the same time remember Bertrand Russell and his pragmatic answer and keep an open mind
