Designing for Democracy Jennifer Forestal, 2022 How should we fix digital technologies to support democracy instead of undermining it In Designing for Democracy Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment a primary component of our modern public square structures our activity shapes our attitudes and supports the kinds of relationships and behaviors democracy requires While many scholars and practitioners are attentive to the role of design in shaping behavior they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them Forestal closes this gap by providing a new theory of democratic space Drawing from a wide range of disciplines including architecture psychology and the history of political thought she argues that democratic spaces must be designed with three environmental characteristics boundaries durability and flexibility that taken together afford users the ability to engage in fundamental civic practices Through extended analyses of Facebook Twitter and Reddit Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or whether they do so at all The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces as well as more concrete suggestions for how to improve them In connecting the built environment digital technologies and democratic theory Designing for Democracy provides blueprints for democracy in a digital age

book gradually introduces more complex concepts as you advance through the chapters Trust in a Complex World Charles Heckscher, 2015-10-30 Can we rebuild trust in a time of increasing conflict and paralysis Or rather can we build trust for the first time wide and strong enough to bring us together to work on the complex problems of our age Relations of trust have been weakened over the past century by a historic expansion of communication and cross cultural interaction and the advance of complex fluid relationships Now the rapid rise of the internet has accelerated the disruption Many long for the comfort and security of relations in which one knew whom to trust and what to expect yet at the same time they may embrace the dynamism and creativity that comes from mixing of cultures and perspectives This book explores current conflicts and confusions of relations and identities using both general theory and specific cases It argues that we are at a catalyzing moment in a long transition from a community in which the prime rule was tolerance to one with a commitment to understanding from one where it was considered wrong to argue about cultural differences to one where such arguments are essential The development of this rich community is essential as well as difficult Complex societies produce complex challenges from climate change to inequality to the risk laden opportunities of bioengineering that demand collaboration among people with widely varying views Such brewing crises cannot be worked through without far more deliberate discussion and cooperation and higher levels of trust than we have today This book explores many challenges ahead and suggests some practical directions for resolving them **Blockchain Revolution** Don Tapscott, Alex Tapscott, 2016-05-10 Blockchain technology is powering our future As the technology behind cryptocurrencies like bitcoin and Facebook's Libra open software platforms like Ethereum and disruptive companies like Ripple it's too important to ignore In this revelatory book Don Tapscott the bestselling author of Wikinomics and his son blockchain expert Alex Tapscott bring us a brilliantly researched highly readable and essential book about the technology driving the future of the economy Blockchain is the ingeniously simple revolutionary protocol that allows transactions to be simultaneously anonymous and secure by maintaining a tamperproof public ledger of value Though it's best known as the technology that drives bitcoin and other digital currencies it also has the potential to go far beyond currency to record virtually everything of value to humankind from birth and death certificates to insurance claims land titles and even votes Blockchain is also essential to understand if you're an artist who wants to make a living off your art a consumer who wants to know where that hamburger meat really came from an immigrant who's tired of paying big fees to send money home to your loved ones or an entrepreneur looking for a new platform to build a business And those examples are barely the tip of the iceberg As with major paradigm shifts that preceded it blockchain technology will create winners and losers This book shines a light on where it can lead us in the next decade and beyond *Antisocial* Andrew Marantz, 2020-09-15 Trenchant and intelligent The New York Times As seen heard on NPR New Yorker Radio Hour The New York Book Review Podcast PBS Newshour CNBC and more A New York Times Book Review Editors Choice A New York Times Notable Book of 2019 From a rising star at The New Yorker a deeply

immersive chronicle of how the optimistic entrepreneurs of Silicon Valley set out to create a free and democratic internet and how the cynical propagandists of the alt right exploited that freedom to propel the extreme into the mainstream For several years Andrew Marantz a New Yorker staff writer has been embedded in two worlds The first is the world of social media entrepreneurs who acting out of na vete and reckless ambition upended all traditional means of receiving and transmitting information The second is the world of the people he calls the gate crashers the conspiracists white supremacists and nihilist trolls who have become experts at using social media to advance their corrosive agenda Antisocial ranges broadly from the first mass printed books to the trending hashtags of the present from secret gatherings of neo Fascists to the White House press briefing room and traces how the unthinkable becomes thinkable and then how it becomes reality Combining the keen narrative detail of Bill Buford s *Among the Thugs* and the sweep of George Packer s *The Unwinding* Antisocial reveals how the boundaries between technology media and politics have been erased resulting in a deeply broken informational landscape the landscape in which we all now live Marantz shows how alienated young people are led down the rabbit hole of online radicalization and how fringe ideas spread from anonymous corners of social media to cable TV to the President s Twitter feed Marantz also sits with the creators of social media as they start to reckon with the forces they ve unleashed Will they be able to solve the communication crisis they helped bring about or are their interventions too little too late **Bertie**
