Paying the Price Sara Goldrick-Rab, 2016-09-01 A bracing and well argued study of America s college debt crisis necessary reading for anyone concerned about the fate of American higher education Kirkus College is far too expensive for many people today and the confusing mix of federal state institutional and private financial aid leaves countless students without the resources they need to pay for it In Paying the Price education scholar Sara Goldrick Rab reveals the devastating effect of these shortfalls Goldrick Rab examines a study of 3 000 students who used the support of federal aid and Pell Grants to enroll in public colleges and universities in Wisconsin in 2008 Half the students in the study left college without a degree while less than 20 percent finished within five years The cause of their problems time and again was lack of money Unable to afford tuition books and living expenses they worked too many hours at outside jobs dropped classes took time off to save money and even went without adequate food or housing In many heartbreaking cases they simply left school not with a degree but with crippling debt Goldrick Rab combines that data with devastating stories of six individual students whose struggles make clear the human and financial costs of our convoluted financial aid policies In the final section of the book Goldrick Rab offers a range of possible solutions from technical improvements to the financial aid application process to a bold public sector focused first degree free program Honestly one

of the most exciting books I've read because Goldrick-Rab has solutions. It's a manual that I'd recommend to anyone out there if you're a parent if you're a teacher if you're a student. Trevor Noah, The Daily Show. **Filing the Fafsa** Mark

Redesigning the Financial Aid System Robert B. Archibald, 2003-05-22 As the cost of higher education continues to rise students and their families find it increasingly difficult to navigate the financial aid maze In Redesigning the Financial Aid

System economist Robert Archibald examines the history of the system and its current flaws and he makes a radical proposal for changing the structure of the system Archibald argues that one of the problems with the current model in which universities are responsible for the majority of grants while the federal government provides student loans is that a student cannot know the final price of attending a given institution until after he or she has applied been accepted and received a financial aid offer As a result students remain largely uninformed about the cost of their college educations until very late in the decision making process and so have difficulty making a timely choice In addition financial aid information is kept private creating confusion over the price of a college education and the role of financial aid Under Archibald s proposed reforms the federal government would assess a student s financial need and provide need based grants while institutions would be responsible for guaranteeing student loans Not only would this new system demystify financial aid and allow students to be better informed about the cost of college earlier in the process but it would greatly simplify the application procedure and prevent financial aid allocation from contributing to the problem of rising tuition costs Archibald s clear explanation of the current system its impact strengths and weaknesses as well as his plans for reform will be of interest to educators administrators students and parents
