Seven Mobile Apps in Seven Weeks

Tony Hillerson, 2016-08-01 Answer the question Can we build this for ALL the devices with a resounding YES Learn how to build apps using seven different platforms Mobile Web iOS Android Windows RubyMotion React Native and Xamarin Find out which cross platform solution makes the most sense for your needs whether you re new to mobile or an experienced developer expanding your options Start covering all of the mobile world today Understanding the idioms patterns and quirks of the modern mobile platforms gives you the power to choose how you develop Over seven weeks you ll build seven different mobile apps using seven different tools You ll start out with Mobile Web develop native apps on iOS Android and Windows and finish by building apps for multiple operating systems using the native cross platform solutions RubyMotion React Native and Xamarin For

each platform you'll build simple but non-trivial apps that consume JSON data, run on multiple screen sizes or store local data. You'll see how to test, how to build views and how to structure code. You'll find out how much code it's possible to share, how much of the underlying platform you still need to know and ultimately you'll get a firm understanding of how to build apps on whichever devices your users prefer. This book gives you enough first-hand experience to weigh the trade-offs when building mobile apps. You'll compare writing apps on one platform versus another and understand the benefits and hidden costs of cross-platform tools. You'll get pragmatic hands-on experience writing apps in a multi-platform world. What You Need: You'll need a computer and some experience programming. When we cover iOS, you'll need a Mac and when we cover Windows Phone, you'll need a computer with Windows on it. It's helpful if you have access to an iPhone, Android phone and Windows Phone to run the examples on the devices where mobile apps are ultimately deployed, but the simulators or emulator versions of those phones work great.

On the Edge of the Panel Julio Cañero, Esther Claudio, 2015-09-04 To create a comic is not to illustrate words but to create narrative diagrams and transform strokes into imaging words. The infinite array of possibilities that the merging of text and pictures provides is a garden of forking paths that critics have just started to explore. This is an art that operates at the crossroads of various disciplines but whose specifications require a thorough understanding of its unique mechanisms. The explosion of experimental works and the incorporation of previously marginal or nonexistent genres and themes in comics have enriched an already fruitful art in ways that continue to surprise both readers and critics. This collection of essays offers a space of reflection on the cultural, social, historical and ideological dimensions of comics. With this in the background, the book focuses on three main areas: the origins and definitions of comics, the formal tools of the medium and authors and their works. The historical and formal approach to comics as shown here is still essential and the debate about the origins and definition is still present, but two-thirds of this collection formulate other treatments that scholars had not started to tackle until recently. Does this mean that the study of comics has finally reached the necessary confidence to abandon the artistic legitimization of the medium? Or are they just new self-defense mechanisms through alliances with other fields of academic interest? This book will add to the debate on comics as did the international conference that led to it. It provides a channel of communication with an art, a two-headed medium that like the god Janus operates as a hinge, as a meeting point, as a bridge between pictorial and literary expression.

The chapters cover a wide range of topics including indigenous digital art, digital drawing, learning to code, social media and artificial intelligence. The authors use a diverse range of theoretical perspectives including posthumanism, feminist new materialism, social semiotics, socialcultural

and multimodal approaches to childhood to generate new ways of seeing the relationship between children and the digital.
