The Digital NBA Steven Secular, 2023-06-20 The National Basketball Association reaches a global audience via a multiplatform strategy that leverages its uncanny ability to connect fans to all things NBA Steven Secular brings readers inside the league's global operations and traces the history of the NBA's approach to sports media from its 1980s embrace of cable through the streaming revolution of the twenty first century As fans around the world stream games and other league content NBA teams incorporate foreign languages and cultures into broadcasts to boost their product's appeal to audiences in Brazil China and beyond Secular's analysis reveals how the NBA continues to transform itself into a wildly successful media producer and distributor more akin to a streaming studio than the sports leagues of old even as its media partners and sponsors erase any notion of sports as a civic good A timely look at a dynamic media landscape The Digital NBA shows how the games we love became content first and sport a distant second Blood in the Garden Chris Herring, 2024-11-12 For nearly an entire generation the New York Knicks have been a laughingstock franchise But in the 1990s they had earned respect not only by winning but also through brute force The Knicks fought opponents They fought each other They even fought their own coaches at time and coach Pat Riley encouraged the nastiness They never won a championship in those

Introductory Mathematics and Statistics through Sports Tricia Muldoon Brown, Eric B. Kahn, 2019-06-11 Sport is a wildly popular and accessible pastime that most students find interest in The link between mathematics and sports particularly between statistics and sports is well known but is rarely used as a method for sparking a real interest and better understanding of mathematics at university level Introductory Mathematics and Statistics through Sports develops this connection and uses sport as a tool to help students get to grips with mathematics and statistics It contains valuable resources such as activities and writing projects for use in quantitative reasoning or introductory statistics classrooms These inquiry based activities and open ended writing projects are all set in the authentic framework of a sporting environment and are designed to promote critical thinking and mathematical application skills that students can apply outside of the classroom All activities and projects have been classroom tested and are ready to be implemented as they are or can be easily personalized by instructors with a helpful run down of successes and misunderstandings for each project Introductory Mathematics and Statistics through Sports places great emphasis on the communication application and internalization of mathematics for students whose primary interests are not necessarily in STEM fields

Walls, Gregory

Bascham,2007-03-09 What can the film Hoosiers teach us about the meaning of life How can ancient Eastern wisdom traditions such as Taoism and Zen Buddhism improve our jump shots What can the Zen Master Phil Jackson and the Big Aristotle Shaquille O Neal teach us about sustained excellence and success Is women s basketball better basketball How ethically should one deal with a strategic cheater in pickup basketball With NBA and NCAA team rosters constantly changing what does it mean to play for the same team What can coaching legends Dean Smith Rick Pitino Pat Summitt and Mike Krzyzewski teach us about character achievement and competition What makes basketball such a beautiful game to watch and play Basketball is now the most popular team sport in the United States each year more than 50 million Americans attend college and pro basketball games When Dr James Naismith the inventor of basketball first nailed two peach baskets at the opposite ends of a Springfield Massachusetts gym in 1891 he had little idea of how thoroughly the game would shape American and international culture Hoops superstars such as Michael Jordan LeBron James and Yao Ming are now instantly recognized celebrities all across the planet So what can a group of philosophers add to the understanding of basketball It is a relatively simple game but as Kant and Dennis Rodman liked to say appearances can be deceiving Coach Phil Jackson actively uses philosophy to improve player performance and to motivate and inspire his team and his fellow coaches both on and off the court Jackson has integrated philosophy into his coaching and his personal life so thoroughly that it is often difficult to distinguish his role as a basketball coach from his role as a philosophical guide and mentor to his players In Basketball and Philosophy a Dream Team of twenty six basketball fans most of whom also happen to be philosophers proves that basketball is the thinking person s sport They look at what happens when the Tao meets the hardwood as they explore the teamwork

patience selflessness and balanced and harmonious action that make up the art of playing basketball **Ebony** ,2001-09
