Islamic Algorithms Gary R. Bunt, 2024-04-04 This book examines how Islam is digitally mediated at a time of technological change enhanced digital literacy and proactive engagement in Islamic online content by authorities and influencers What is the impact of this on societies believers and understandings of Islam Islamic Algorithms provides a thorough exploration of Cyber Islamic Environments CIEs through representations of significant historical and religious influences across contexts and diversities This ranges from jinn and angels through to contemporary influencers Gary R Bunt raises issues of how digital content is embedded in contemporary understandings of Islam and their dissemination Bunt shows how the interpretation of pivotal figures in Islam including Muhammad and his family scholars and imams can be informed by new generations of digital influences such as apps and social networking which have become primary sources of information for many Muslims globally

The British Folk Revival Michael Brocken, 2022-08-26 Almost 20 years ago Michael Brocken created from his doctoral research what became both a seminal and contested volume concerning the social mores surrounding the British Folk Revival up to that point in time The British Folk Revival 1944 2002 In this long overdue second edition he revisits not only his own research but also that of others from the 1990s and early 21st century He then considers how a discourse of folkloric authenticity emerged in the closing years of the 19th century and how a worrying nationalistic immanence came to surround folk music and dance during the inter war years Brocken also proposes that the media records radio and TV in post WWII folk revivalism can offer us important insights into how self directed learning of the folk guitar emerged Brocken moves on to consider the business structures of the contemporary folk scene and how relationships are formed between contemporary folk business and the digital and social media spheres In his penultimate chapter he discusses the masculinisation of folk traditions and asks important questions about how our folk traditions are carried and are authorised In the final chapter he also considers the rise of an exciting new folk live music built environment

Higher Ground Alison Taylor, 2024-02-13 Named one of the Best books of 2024 Business by the Financial Times An indispensable guide to help companies navigate the new era of ethical challenges and risks in a volatile global landscape

Today's headlines teem with employee unrest over racial injustice communities infuriated by corporate environmental impacts staff anxiety over surveillance public outrage over corruption in business and discoveries of child labor in supply chains We've traveled far and fast from the old world of business ethics where black and white concerns about bribery and fraud could be addressed via rules and processes Simply maximizing shareholder value while not breaking the law is no longer a tenable approach but we've never been so confused about what it means to do the right thing and why it's so important In this eye opening essential book NYU Stern ethics professor Alison Taylor argues that amid stakeholder demands and transparency pressures we can no longer treat ethics as merely a legal and reputational defense mechanism Leaders at Davos and the Business Roundtable have called for a new corporate responsibility paradigm but organizations struggle to implement these ideas in an atmosphere of heightened expectations and intense suspicion Offering vivid stories and examples from years working in anti corruption and advising companies on ethics Taylor brings this complex risky environment alive to provide a blueprint for how leaders can rethink and reshape their practices How can CEOs cut through the noise to set robust environmental and social priorities When should they speak out on contentious social and political issues and how What does it really take to build a healthy organizational culture How are we to approach corporate values when society itself is so divided Higher Ground shows leaders how business can navigate this messy paradigm shift build trust and achieve long term strategic advantage in a turbulent world E - Commerce & Digital Marketing Strategies

Generations in the World of Work Corey Seemiller, Meghan Grace, 2024-12-30 *Generations in the World of Work* provides invaluable data informed insights into the intergenerational dynamics in today's workplaces. Generational experts and authors of *Generation Z A Century in the Making* Corey Seemiller and Meghan Grace present the perceptions, motivations, and preferences of various generational cohorts and share how those shape individual behaviors, communication, and collaboration, as well as wider organizational structures and norms. They offer guidance for how to maximize productivity and relationships to navigate dynamics across generational cohorts. *Generations in the World of Work* offers employees, managers, and organizational leaders guidance for maximizing productivity, relationships, wellbeing, and engagement across generational differences in order to create thriving workplaces that value and leverage each person's strengths. *Economic Shocks and*

Globalisation Elsabé Loots, 2024-08-01 Over the 153 year period since 1870, the phenomenon of globalisation has been shaped and reshaped. As we look back at the events that shaped our understanding of the process and its momentum before and after the Global Financial Crisis (GFC), it became clear that the process of globalisation has changed and continues to evolve, which requires a deeper analysis. The book answers the question of why the performance of the hyper globalisation period has not continued during the post GFC period after 2010 and what might be expected going forward. Apart from the fact that the fourth globalisation wave period between 2010 to the early 2020s has been characterised by a range of global shocks that caused more volatility, instability, and uncertainty, the major economic determinants of globalisation have also slowed markedly. The outbreak of the COVID-19 pandemic followed by the geopolitical uncertainty and instability all caused global contagion effects around the world with economic, socio-economic, and geopolitical consequences and responses. This book aims to analyse most of these global events and shocks and attempted to gather a deeper understanding of the present drivers of globalisation and what the major trends and shifts are geo-economically, socio-economically, and geopolitically. The conclusions drawn include that globalisation remains despite the current slowbalisation, an integrated process that is globally entrenched yet complex, cyclical, multifaceted, and multiplex. This book is aimed at academics in economics, political sciences, social sciences, and may also find an audience among international policymakers and scholars at multilateral institutions such as the World Bank and the United Nations.

Nudging Choices Through Media James Katz, Katie Schiepers, Juliet Floyd, 2023-06-30 This book addresses the growing use of computerized systems to influence people's decisions without their awareness, a significant but underappreciated sea change in the way the world works. To assess these systems, this volume's contributors explore the philosophical and ethical dimensions of algorithms that guide people's behavior by nudging them toward choices preferred by systems architects. Particularly in an era of heightened awareness of bias and discrimination, these systems raise profound concerns about the morality of such activities. This volume brings together a diverse array of thinkers to critically examine these nudging systems. Not only are high-level perspectives presented, but so too are those of those

who use them on a day to day basis While algorithmic nudging can produce benefits for users there are also many less obvious costs to using such systems costs that require examination and deliberation This book is a major step towards delineating these concerns and suggesting ways to provide a sounder basis for future policies for algorithms It should be of interest to system designers public policymakers scholars and those who wonder more deeply about the nudges they receive from various websites and on their phones

Eating Culture Gillian Crowther,2025-07-15 Eating Culture chews over the continuities and changes in human food consumption from hunter gathering to ultra processed foods to digest the ramifications for people s identity work health and long term cultural distinction The new edition uses the concept of cuisine to trace humanity s relationship with food thematically explored through health sociality and identity It evaluates dietary change decent meals and food commodification alongside threats to security and health Drawing on ethnographic examples dietary transitions are situated in changing political economic and social circumstances presenting a critical approach necessary to explore our current global food system Chapters on cooking recipes and eating in and out offer relatable examples underlining the significance of everyday life and incorporating an ethnographic approach that extends into practical exercises aligned with each chapter s themes to highlight the relevancy of our own experiences Vividly illustrated the book explores dishes from various global cuisines offering insights into people s culinary traditions and enriching our understanding and appreciation of food as a fundamental aspect of culture in our daily lives Ultimately Eating Culture presents a critical examination of how deeply food is entwined with our identity
