Big Java Cay S. Horstmann,2017-05-01 Big Java Late Objects 2nd Edition focuses on the essentials of effective learning and is suitable for a two semester introduction to programming sequence This text requires no prior programming experience and only a modest amount of high school algebra It provides an approachable introduction to fundamental programming techniques and design skills helping students master basic concepts and become competent coders It takes a traditional route first stressing control structures procedural decomposition and array algorithms Objects are used where appropriate in early sections of the text Students begin designing and implementing their own classes in Section 9 The second half covers algorithms and data structures at a level

suitable for beginning students Choosing the enhanced eText format allows students to develop their coding skills using targeted progressive interactivities designed to integrate with the eText All sections include built in activities open ended review exercises programming exercises and projects to help students practice programming and build confidence These activities go far beyond simplistic multiple choice questions and animations They have been designed to guide students along a learning path for mastering the complexities of programming Students demonstrate comprehension of programming structures then practice programming with simple steps in scaffolded settings and finally write complete automatically graded programs The perpetual access VitalSource Enhanced eText when integrated with your school s learning management system provides the capability to monitor student progress in VitalSource SCORECenter and track grades for homework or participation Enhanced eText and interactive functionality available through select vendors and may require LMS integration approval for SCORECenter

Learn Selenium Unmesh Gundecha, Carl Cocchiario, 2019-07-18 Learn end to end automation testing techniques for web and mobile browsers using Selenium WebDriver AppiumDriver Java and TestNG

Key Features Explore the Selenium grid architecture and build your own grid for browser and mobile devices Use ExtentReports for processing results and SauceLabs for cloud based test services Unlock the full potential of Selenium to test your web applications

Book Description Selenium WebDriver 3 x is an open source API for testing both browser and mobile applications With the help of this book you can build a solid foundation and can easily perform end to end testing on web and mobile browsers You ll begin by being introduced to the Selenium Page Object Model for software development You ll architect your own framework with a scalable driver class Java utility classes and support for third party tools and plugins You ll design and build a Selenium grid from scratch to enable the framework to scale and support different browsers mobile devices and platforms You ll strategize and handle a rich web UI using the advanced WebDriver API and learn techniques to handle real time challenges in WebDriver You ll perform different types of testing such as cross browser testing load testing and mobile testing Finally you will also be introduced to data driven testing using TestNG to create your own automation framework By the end of this Learning Path you ll be able to design your own automation testing framework and perform data driven testing with Selenium WebDriver This Learning Path includes content from the following Packt products

Selenium WebDriver 3 Practical Guide Second Edition by Unmesh Gundecha Selenium Framework Design in Data Driven Testing by Carl Cocchiario

What you will learn Use different mobile and desktop browser platforms with Selenium 3 Use the Actions API for performing various keyboard and mouse actions Design the Selenium Driver Class for local remote and third party grid support Build page object classes with the Selenium Page Object Model Develop data driven test classes using the TestNG framework Encapsulate data using the JSON protocol Build a Selenium Grid for Remote WebDriver testing Build and use utility classes in synchronization file I O reporting and test listener classes

Who this book is for This Learning Path is ideal for software quality assurance testing professionals software project managers or software developers interested in using

Selenium for testing their applications Professionals responsible for designing and building enterprise based testing frameworks will also find this Learning Path useful Prior programming experience in Java and TestNG is necessary
